SEED MERCHANTS

BETWEEN 316-318 WALNUT ST.
THIRD-FOURTH CINCINNATI, OHIO.

WING to our increasing trade in Garden and Flower Seeds, we have been compelled to increase our floor space, and now use the entire buildings, 316 and 318 Walnut Street for our retail trade. We are in position to give our customers the best quality at lowest price and prompt service.

We have also added a Poultry Department, and carry a full line of the latest improved Incubators, Brooders, Bone Mills, etc.

Our customers are cordially invited to call and inspect our improved Warchouses, both in the Garden and Grass Seed Departments

Instructions to Purchasers.

ALL SEEDS IN PACKETS, OUNCES and QUARTER POUNDS only, are sent free by Mail at prices quoted; Half-pounds, Pounds, Pines, Quarts, and larger quantities, if to be sent by Mail, postage must be added to price quoted at the rate of ten cents per pound and sixteen cents per quart.

Order early.—It will greatly facilitate shipments if orders are sent early. We aim to send off all orders the day received, but during the busy season it is nearly impossible—hence the advisability of ordering early.

Customers who buy at our counters, or wish to pay their own express charges may deduct ten cents per pound on all seeds bought by the pound, if quoted at prepaid rates.

Send the money with the order - Postal Note, Post Office Order, Registered Letter, Express Money Order, or Draft on Cincinnati or New York.

In view of the fact that the express companies make a special low rate on small packages of Seeds, Plants and Bulbs, we would suggest that patrons remit by Express Money Orders, which can be obtained at nearly all the express offices. United States Postage Stamps will be received for small amounts; be exceedingly careful about the least moisture getting on them when remitting, as they sometimes reach us so stuck together as to be almost worthless.

We do not send C. O. D.—Everything being plainly priced, the return charges on money is an unneces sary expense.

Should you change your address, we will esteem it a favor if you will notify us, so we can forward our Catalogue with regularity; if you receive two Catalogues of the same kind, please hand one to some friend who has a garden.

Should an error occur, we desire to be promptly informed, and will take pleasure in making satisfactory corrections.

Write your Name and Address distinctly and in full; please use the Order Sheet and Envelope inserted in this Catalogue.

We shall always be pleased to reward customers who send us the name and post office address of their friends who will buy Seeds, Plants, Bulbs, etc.

About Warranting Seeds.—We have often been asked if we "guarantee or warrant our seeds." We beg to state plainly we do not, for the reason that practical experience has assured us of the fact that crops may fail, no matter how fresh or pure the seed sown may be. We trust that our customers will fully realize that it is to our interest to send none but the very best quality of seeds. It would be folly to do other wise, unless we wanted to sacrifice our good reputation for selling Reliable Seeds, which we are constantly striving to extend.

To secure success, however, it is necessary that the customer should do his part well, or our good seeds will be ruined. With the best of management and with good seeds there will be an occasional unaccountable failure. The best of gardeners sometimes fail, and try again with the same seed with good results.

We test all our Seeds before sending them out, and while we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept Seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

J. M. McCULLOUGH'S SONS

----SELECTION OF----

NOVELTIES AND SPECIALTIES

Vegetable, Flower and Farm Seeds.

In this selection we offer only those varieties that we feel assured will give perfect satisfaction, both in appearance and quality in the home garden, while commanding highest prices for market purposes.

Norwood Giant Stringless Green Pod Bean.

This variety is far superior to any other green-podded bean grown, and will be highly appreciated by all who grow for grown, and will be highly appreciated by all who grow for market, also by those who grow for their own use. It is positively stringless, and ripens fully a week earlier than the well-known Red Speckled Valentine Bean. The pods, which are produced in abundance on the vines, are long and very fleshy; perfectly round and very meaty quality is the very finest. Per pkt., 5c; pint, 15c; quart, 30c; per peck, \$2.00.

FLAGEOLET RED WAX BEAN. Flat, yellow stringless, pods of great size. Per pkt. 5c; pint, 15c; quart, 30c; per peck, \$2.00.

FEFUGEE WAX BAEN. A perfect refugee with long, round wax pods, stringless; suitable for early and late sowing, and an immense yielder. Per pkt., 5c; pint, 15c; qt., 30c; per peck, \$2.00

ROUND POD WAX BEAN. This is a novelty in the true sense.

Has never been known to rust. This is singular, as most all Wax-Podged beans will do so at times. It is tender, delicious and almost stringless. Pods of a rich golden color, often seven inches in length. Don't fail to try it.

Per pkt., 5c; pint, 20c; per quart, 35c; per peck, \$2.50.

LENTINE WAX BEAN. An improved extra early Valentine Bean, with round wax pods. It is without exception the earliest Wax Bean. The pods are very meaty, and with so very little string that they may justly be called stringless. It is remarkably free from rust, and remains a long time without becoming tough. Per pkt., 5c; pint, 15c; quart, 30c; per peck, \$2.00.

ohio wax pole Bean. This novelty is an improved large podded variety. The pods, usually seven inches or more in tength, are so fleshy that they are frequently greater in width than breadth. They are solidly meaty, entirely stringless and when cooked deliciously rich and buttery. It commences to bear when scarcely higher than the bush variety and keeps on producing until killed by frost. It is a rampant grower, one plant filling a pole with a mass of vines densely loaded with luscious beans, almost a solid mass of pods from bottom to top. The finest Wax Pole Bean. Don't fail to give it a trial. Per pkt., 10c; pint, 25c; quart, 40c;

Wax Pole Bean. Don't fail to give it a trial. Fer pace, 2007, 2007, per peck, \$2.51;

ASPARAGUS or YARD LONG BEAN. This is a curiosity, long slender, round pods of excellent quality. The pods grow from 2 to 3 feet long, and are very slender, like a pipestem very curious; should be grown on pea brush. Per pkt., loc; 3 pkts, 25c.

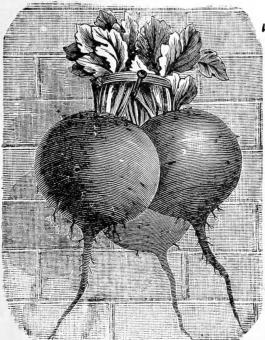

COLUMBIA BEET. One of the finest main-crop Beets either for market or the home garden. Flesh deep blood-red, tender, and of rich flavor. The roots can be used early in the season when only partially grown, being ready for use almost as quickly as the Extra Early sorts, and of finer quality. It retains its fine quality and freedom from woodiness, until the beets

from woodiness, until the beets have reached their full size. 5c pkt.; 10c oz.; 25c 1/4 lb.; 75c lb.

DETROIT DARK RED TURNIP FEET.
One of the best deep red turnip beets not only for market gardeners, but for the home garden. Its small upright-growing tops, early maturing and the splendid shape and color of the roots, make it popular with every one who plants it. Color of skin dark blood-red; flesh bright-red zoned with a lighter shade very red, zoned with a lighter shade, very crisp, tender and sweet, and remaining so for a long time. 5c pkt.; loc oz.; 25c 1/4 lb.; 75c lb;

HALF LONG BLOOD BEET. One of the best for winter use. Roots are only half as long as the Long Blood, but weigh as much on account of their thickness. They are always smooth and handsome, and their rich, dark red fiech is very sweet, crisp and tender, never becoming woody even in the exposed portions. 5c pkt.; 10c oz.; 25c 1/4 lb.; 75c lb.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent by Mail, at prices quoted. Half-pounds Pounds, Pints, Quarts, and larger quantities if to be sent by mail postage must be added to prices at the rate of ten cents per pound and sixteen cents per quart.

Columbia Beet.

Ohio Wax Pole.

IMPROVED RUBICON CARROT.—This beautiful half-long Carrot was originated in Connecticut by a reliable grower. It is the result of careful breeding and in shape and color most desirable. The Carrots grow about same length as the well-known Danvers, but thicker, and are a rich, dark orange in color. It is an enormous cropper and a splendid variety for the market gardener .5c pkt., 10c oz., 30c 1/4 lb., 80c lb.

EARLY SHEFFIELD SUGAR CORN.—A new early variety; a cross between Cory and Extra Early Adams. It combines not only the merits of these two leading varieties, but is superior to either. The Sheffield can be planted fully as early as the Adams, as the young plants will withstand slight frosts. The stalks are strong and vigorous, growing about five feet in height, bearing one or two fine ears to a stalk. The ears are quite large for so early a variety, and are entirely free from smut. The grains are of medium size, arranged in ten or twelve regular rows, well filled to each end of the ear; juicy, and of a fine sweet flavor, 5c pkt., 10c pint, 20c quart, \$1.00 peck.

MANY HEART CELERY-This is one of the best keeping Celeries in the market to-day and having plenty of heart, which is the important fact-or, it sells well; also the delicious flavor, besides being very brittle, makes it very desirable. e pkt., 30c oz., 85c 141b. Shumacher Cel= ery. The finest dwarf winter Celery, being similar to the Golden Self-Blanching, but of a

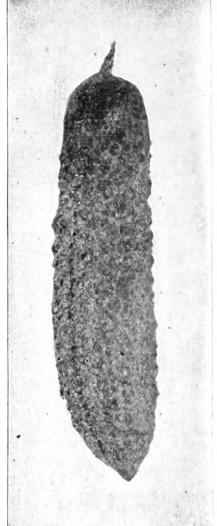

Paris Golden Yellow.

McCullough's Paris Golden Yellow Celery.

The best Celery for early use. Its rich, golden yellow color, close habit and compact growth, and, greater than all, the readiness with which it is bleached and rendered marketable, makes it invaluable to the gardner and exceedingly popular with every planter. The entire stalk is solid and

EARLY SPRING CABBAGE.—Fully as early as the Jersey Wakefield, but the heads are of the round, flat type of early summer. It has very few small outer leaves, thus

The Cumberland.

rich green color like the Giant Pascal. It is more readily blanched than the latter and ready

for use much ear-lier in the fall. The plants make large bunches of extra heavy stalks with a very large heart. The entire stalk is solid and crisp, and of a rich golden yellow when blanched..... 5c pkt., 20c oz., 60c 1/4 ib

Lettuce.

Norwood Lettuce. One of the best for forcing; extensively grown in

Grand Rapids. As a lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list, being of quick growth, little liable to rot and standing for some days after being fit to cut. Inttle hable to rot and standing for some days after being fit to cut.

The plant is upright, and forms a loose head or cluster of large, light yellowish-green leaves, slightly crimped and blistered and rather thin, which will stand shipping long distances better than most sorts.

5c pkt.;15c oz.;40c ½ lb.;\$1.00 lb. Yellow-Seeded Butter. A distinct sort, making a compact yellow head, of excellent flavor, withstands heat well and remains crisp and tender.

5c pkt.;15c oz.;40c ½ lb.;\$1.00 lb.

and tender 5c pkt.; 15c oz.; 40c ½ 1b.; \$1.015.

Immensity Lettuce. A strong growing and large heading late summer lettuce. The plants are of strong vigorous growth, the leave are a rich bright green and grow well up around the large globular heads.

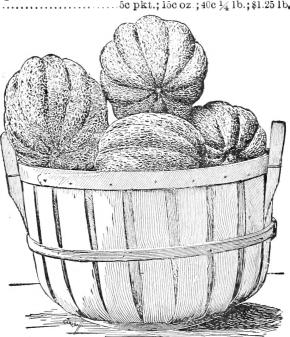

They will measure eight inches and over and are tightly folded, so that the interior portion is beautifully blanched, crisp, and tender It is one of of the best late heading varieties. In a cool season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this first tender is the season and rich soil, this season are tightly folded, so that the interior portion is beautifully blanched, crisp, and tender is the season and rich soil, this season are tightly folded, so that the interior portion is beautifully blanched, crisp, and tender is the season are tightly folded, so that the interior portion is beautifully blanched, crisp, and tender is the season are tightly folded, so that the interior portion is beautifully blanched, crisp, and tender is the season are the season Yellow Seeded Butter Lettuce. with a mild, sweet flavor. It is one of of the best late headir variety will produce heads of truly immense size.....

MUSK MELON.

Paul Rose Musk Melon. Cross between the old Netted Gem and Miller's Cream, and combines in a remarkable degree the good qualities of both. The fruit grows very uniformily, and of an attractive and useful size for packing. It is a very heavy cropper, the vines are very healthy and robust, ripening an enormous number of fruits. The flesh is salmon colored, very deep and of fine melting character with thin tough rind and small seed cavity. The flavor is excellent, very sweet and rich5c pkt.; 10c oz.; 35c 1/4 lb.; \$1.25 lb.

WATER MELON.

Kleckley's Sweet Water Melon. Vines strong and vigorous and the fruits grow uniformily to quite a large size; oblong in form rather tapering at the ends. The skin is a rich dark green, while the flesh is bright scarlet, ripening close to the skin, the rind being only about one-half inch in thickness. The rich, bright scarlet flesh is crisp, sugary and melting to the highest degree, being entirely free from any stringiness. The rich coloring of the flesh, together with its luscious sweetness combine to make it one of the finest table melons5c pkt.; 10c oz.; 30c 1/4 lb,; \$1.00 lb.

Paul Rose Musk Melon.

Hoosier King.

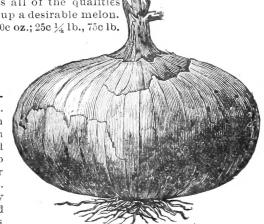

ONION.

Australian Brown Onion. 1s a most attractive market onion, very uniform and a fine appearance, being medium size, very hard and solid. It is very early, and never makes any stiff necks or scullions. When the plant is only three inches high, the bulb begins to form. Much earlier than the Red Wetherfield and ripening so uniform, it will make its mark. Owing to its firmness and hardiness, it should keep longer in good condition than any other onion. The color is a clear amber-brown. 5c pkt.; 15c oz.; 40c 1/4 lb.; \$1.00 lb.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

Hoosier King Water Meion. A large variety, oblong shape, with skin striped light and dark green. The flesh is brilliant red, very solld sweet and luscious; the rind is thin but tough, making it a good variety for shipping. The beautiful markings together with its desirable shape, make it an attractive and saleable melon........5e pkt.; 10e oz,; 20e ¼ lb.; 60c lb.

Triumph Water Melon. A cross between Duke Jones and Kolb's Gem. It has the handsome appearance of the former and the shipping qualities of the Gem, early prolific deliciously sweet, and of enormous, size. It possesses all of the qualities that go to make up a desirable melon.5c pkt.; 10c oz.; 25c 1/4 lb., 75c lb.

Australian Brown Onion.

PEAS.

Admiral Dewey Peas. Height 3½ feet; foliage, vine and pod rich dark green; remarkably heafthy and vigorous, producing in abundance; pods of largest size, frequently six inches in length, beautifully shaped and well filled with peas of largest size, tender and first-class flavor. Seed green wrinkled 10c pkt., 20c pint, 35c quart, \$2.50 peck.

McCullough's Improved Telephone Peas. An improved strain of Telephone, being more productive, larger pods and superior quality. A first-class market-gardener's variety.

5c pkt., 20c pint, 35c quart, \$2.00 peck.

Long Island Mammoth Peas. A strong grower, producing mammoth pods containing ten to twelve large peas. When cooked they are a deep, dark green color and fine flavor. Add it to your order and you will be pleased 5c pkt., 20c pint, 35c quart, \$2.00 peck.

RADISH.

McCullough's Cincinnati Market—Original Strain Radish. The radish so much grown by the Cincinnati market gardeners, and is the handsomest Ret gardeners, and is the handsomest long Radish in cultivation. It is a beautiful glossy scarlet, with a very small top, and grows from six to seven inches long. The skin is very thin, and the flesh crisp and brittle, and of a delightful pungent quality. It is undoubtedly the finest long red Radish for foreign and will outself Radish for forcing, and will outsell any other on the market; and it is also an extra fine sort for the home garden, the quality being unexcelled.

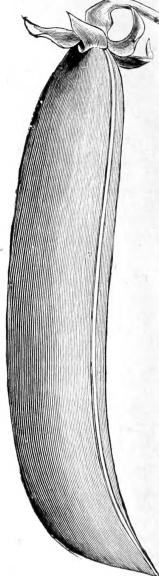

garden, the quality being unexcelled.
5c pkt.. 10c oz., 25c ½ lb., 75c lb.
Cardinal Globe Radish. This Radish grows globular in shape, and is a brilliant cardinal color. The quality is fine, being crisp and tender; not only a good forcing Radish, but does well in open ground.
5c pkt., 10c oz., 25c ½ lb., 75c lb.
Crimson Giant Forcing Radish. This new Radish is an entirely new type, and differs copsiderably from all the varieties hitherto in cultivation. in

varieties hitherto in cultivation, in so far as its roots attain more than double the size of other forcing varidouble the size of other forcing varieties, without getting pithy or hollow. The New Giant Radish develops roots of 6 to 7 inches in circumference and over an ounce in weight, their pure white flesh remaining firm and crisp and of the mildest flavor. It varies as to form, some of the roots being round and others inclining to oval, but its beautiful deep crimson

color is quite constant.

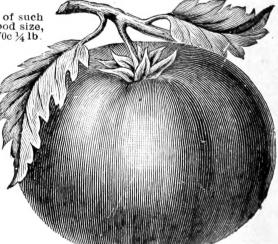

15c pkt.; 3 pkts. for 35c.

White Icicle Radish. The finest early long white Radish; the young radishes are ready for use in 25 days, and continue to grow for a long time, fully retaining their pairs. and continue to grow for a rong time, fully retaining their crisp tenderness and mild flavor until quite large; most highly recommended. 5c pkt., 10c oz., 25c 1/4 lb., 75c lb.

Admiral Dewey.

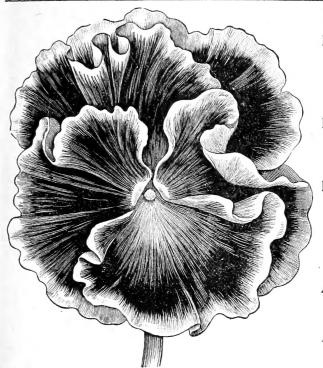

TOMATO.

Norwood Tomato.

Though such a productive variety it ripens a large

Strawberry, or Winter Cherry (Husk Tomato). Plants of low, spreading growth and immensely productive. The small yellow, and of very sweet flavor, highly esteemed for preserving or making pies. They are also excellent to eat raw as fruit. 5c pkt., 25c oz

Flower Seed Novelties and Specialties.

PANSY-Masterpiece. The enormous large flowers are borne well above the foliage on strong stems. The petals of the flowers are waved or curied. The flowers are perfectly round and contains the richest combination of colors, that have ever been offered in a five spotted Pansy. Each petal is distinctly marked with a very large dark blotch and most of the flowers are margined with a light, white or yellow edge

PANSY-Pretiosa Giant. A distinct variety of the Giant Five Spotted Pansies. Each petal is marked with a very large blotch of deep violet color, these blotches are surrounded by a brilliant crimson rose ground color, and the ground color is margined with a pure white edge. A very effective and bright variety ...26c

PANSY—McCullough's Premier. This strain is saved from the finest flowers, from the best growers of Pansies in the world. The plants are compact and of robust growth, and if cultivated properly will give an abundance of very large flowers of unsurpassed brilliancy of color and distinct markings. Florisis and amateurs desiring charming 'show' flowers should not neglect this strain, as it is the result of many years' careful selection and hybridization and embraces all the attractive features that tend to make the Pansy; the people's flower 4 oz. \$2.00; 25c

ANTIRRHINUM—Queen Victoria. This is the finest large flowering pure white Snapdragon, yet offered; unusually large, are borne on long and graceful stalks: splendid

ARCTOTIS GRANDIS-THE AFRICAN LILAC DAISY

A handsome new annual from South Africa, growing luxu-Pansy Masterpiece.

Pansy Masterpiece.

On long stems are from 2'4 to 3 inches across; the ray florets being pure white on the upper surface, reverse of petals pale lilac. Under the influence of the bright sunlight the flowers spread out almost flat, and the pure white of the ray florets contrasts beautifully to to the light blue disk with its slightly projecting white stamens, a lovely combination of colors. Being of very easy culture, the plants produce their splendid flowers most abundantly and in constant succession from early Summer to the Autumn 10c nkt. 13 nkts. 25c.

succession from early Summer to the Autumn. 10c pkt.; 3 pkts. 25c. CELOSIA.—Magnifica. A fine variety of true pyramidal branching growth, covered with handsome feathery plumes, the flower spikes range in color from yellow to darkest red. 10c pkt.; 3 pkt., 25c.

CELOSIA.—Spicata. A handsome variety 21/2 feet high, with numerous branches surmounted with flower spikes of a bright rose color, the lower part changing to a silvery white, making a very pleasant contrast. 10c pkt.; 3 pkt. 25c. CENTAUREA—Imperialis. This beautiful class is the result of a cross between C, Moschata and C. Marguerite, and inherit from the latter the beautiful sweet-scented, artistic shaped flowers, but much improved in size and borne on long, strong stems, and when cut will stand for several days in good condition. The plant is a strong grower, of the easiest culture, flowering continuously from early Summer till Autumn. Finest mixed 10c pkt.; 3 pkt., 25c.

CENTAUREA—Depressa. (King of Cornflowers.) In this new variety the clear deep blue flowers are much larger. Plant also larger and more vigorous; a great improvement 10c pkt.; 3 pkt., 25c.

CHRYSANTHEMUM—Segetum Helios.

(Annual Golden Marguerite.) This is a splendid annual for cutting. The flowers which are 3 to 4 inches across are a pure golden yellow of much substance, and last for several days when cut. In general appearance it resembles the Yellow Paris Daisy, or Marguerite, but with the added advantage of requiring only the culture of an ordinary annual 20c pkt.; 3 pkt., 50c.

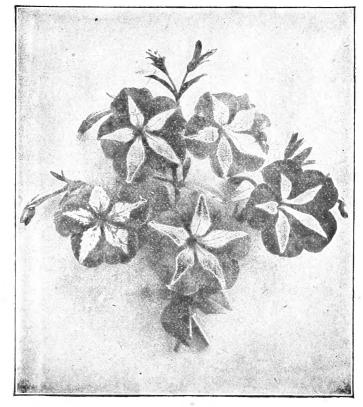

COSMOS—Giant Rainbow. One of the most

magnificent new Cosmos that has yet been intro-

STAR PETUNIAS. The difference from other

petunias is the blossoms, which are marked with a star in the center. This star, from which the name is taken, varies in size. Rays of crimson often run through the star and line the edge. In some of the flowers, these crimson markings give it a feathery appearance. The color may be called a purple crimson, but it has a velvety depth and richness which cannot be described. richness which cannot be described

The plant is dwarf, 18 inches to 2 feet, more delicate than the original type, a free bloomer, bearing over 100 blooms to a plant, while as many as 180 have been counted on a single specimen at one time. The blossoms are of good substance of panyles petal and of the velvety appearance of pansies.
10c pkt.; 3 for 25c

Star Petunias.

DAHLIA, TWENTIETH CENTURY.—(New Orchid Flowered Single Dahlia.) A grand novelty, the plants grow 5 feet high, strong and vigorous; producing a mass of flowers on stems 2 to 3 feet long. The flowers are large size, 41/2 to 7 inches across; the color is a rich rosy-crimson, passing to white at the tips. As the season advances the colors lighten, until finally they come clear white, suffused with rose. Single Dahlias are as easily raised from seed as the commonest annuals. Sown in the open ground when the weather has become warm, they flower in August. For the longest

Roots 50c Each, \$5.00 Dozen.

NASTURTIUM, JUPITER.—New Giant Flowered Climbing variety from California. "As beautiful as an Orchid," ing variety from California. "As beautiful as an Orchid," has been remarked of this magnificent flower, the precurser of a new race of giant Nasturtiums. The plants are very strong and vigorous with large dark green foliage. The great, rich pure yellow flowers measure 3½ inches across. The petals are large—1½ inches in diameter, they overlap and are exquisitely and deeply crinkled like crepe. The flowers are very fine for anting recembling orchids in their rich hearty. A grand and cutting, resembling orchids in their rich beauty, distinct variety. 10c pkt., 3 pl rich beauty. A grand and 10c pkt., 3 pkts. 25c, 50c oz

POPPY, IRRESISTABLE.—Giant paeony flowered, splendid giant poppy, resembling an immense paony. Color light red, shaded lighter at edge of petals; strikingly beautiful 10c pkt., 3 pkts. 25c.

POPPY, MAID OF THE MIST.—New Giant White. A magnificent, new, single white Poppy. The flowers measure from 7 to 9 inches across, and are deeply and irregularly fringed. The ovary, encircled with its fringe of stamens and white fluffy petals, suggests a pretty face looking out from the mist.

10c pkt., 3 pkts. 25c.

SALVIA SPLENDENS SILVER SPOT.—The leaves are rich dark green, with light sulphur or cream-colored spots of various size liberally sprinkled over them. The unique and elegant foliage is very abundant, and has an extremely fresh and healthy appearance. The intense bright scarlet flowers are large and the plants of neat compact habit.10c pkt., 3 pkts. 25c. variety of great effect

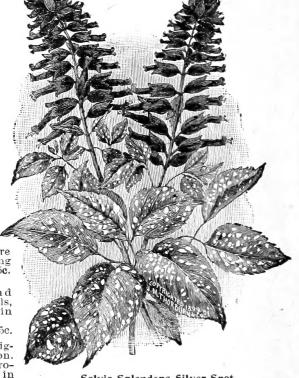

SCABIOSA CAUCASIA PERFECTA.-Fine, large and fringed, new variety. One of the handsomest hardy perennials, especially adapted for cutting, the blooms lasting a long time in 10c. pkt., 3 pkts. 25c.

SHASTA DAISY .- This is a grand, large-flowering Daisy, orig-

inated by Luther Burbank, and improved by careful selection. The plants are entirely hardy, are very robust in growth, and produce larger and finer flowers each season as the plants increase in strength. Small plants do not flower until late the first summer, but when well established large flowers are produced freely throughout the second season. The flowers measure fully four inches in diameter, and while single have three or more rows of long, slender snowy-white petals, surrounding a small golden-yellow center or eye. As the large flowers come singly on a stiff slender stem nearly 2 feet in length, they are especially useful as cut flowers to arrange in tall vases, etc., as well as most showy bloomers for planting in beds or horders of perennial or hardy flowers. beds or borders of perennial or hardy flowers25c pkt., 5 pkts. \$1.00

Fern Ba!! in Leaf.

JAPANESE FERN BALLS .- Is composed of Japanese Island Fern Roots and Sphagnum Moss, and so constructed as to send out leaves beautiful dark green from every point. They are easy to take care of, and if let dry out about every three months and allowed to rest a while, they will last indefinitely.

Don't fail to order some, as from the satisfaction they have given the demand is beyond the

Directions .- Place the ball in water for one hour, and then hang in a desirable position; in two days dip again for fifteen minutes, and repeat every two days till the growth is started, after which only dip twice a week for five minutes at a time. Order now and make sure of them.

If wanted by mail, 15c each, extra. Large size, in leaf, \$1.25; by express, not prepaid.

THE GIANT=FLOWERING CALADIUM,

NEW CENTURY .- A new species, introduced from Central America. It produces leaves from three to five feet long, two to two and one-half feet broad, and is much larger than the ordinary Cala-

dium or Elephant's Ear. The leaves are of a heavy leathery texture, bright glossy green color, with metallic lustre and are held on stout, stiff stems well above the ground. Added to the foliage effect are the creamy white Lily-like flowers, from twelve to fifteen inches long, which possess an exquisite fragrance, and are produced throughout the Price, 25c each

Farm and Field Seed Specialties.

CORN—McCullough's Champion White Dent

The earliest White Dent Corn. Will mature in ninety days, therefore may be sown later than any other variety, and still there is no danger of it being damaged by frost. Produces generally two large ears to the stalk, and in good land will yield 100 bushels to the acre.....40c peck; \$1.25 bu.; 2 bu. \$2.30.

STATE CORN—Peerless. The best White Dent Corn, if planted early, say May 10th to 20th, it will come nearer making a crop of corn without rain than any other known variety. It is known to have been successfully grown 100 miles north; makes a wonderful growth as far south as Georgia.

......40c peck; \$1.25 bu.; 2 bu., \$2.30

The heads are long, slender, compact and grow erect; they measure from one to two feet. The seed is red smaller than that of the white, and rather hard and brittle. It does well on poor land and yields well. It ripens a little earlier than the white variety and yields much heavier. 5c lb.; 10 lbs., 40c; 100 lbs.; \$2.50.

WHITE KAFFIR CORN. It grows from four to five feet high, making a straight, upright RED KAFFIR CORN.

growth. It has a stalky stem, with enormous wide leaves. The stalks keep green and are brittle and juicy, not hardening like other varieties of sorghum, making excellent fodder, either green or dried, which is highly relished by eattle, horses and mules. The seed heads form at the top of each stock, and as soon as these show the grain well, the joints next below the top send up shoots which yield the second seed heads. For the grain sow in rows three feet apart, 3 to 5 lbs., of seed to the acre. For fodder sow 25 to 50 lbs., either broadcast or in drills. 5c lb.; 10 lbs., 40c; 100 lbs., \$2.25,

Tennessee or German Golden Millet.

True Sonthern Grown Seed is worth double

nnessee or German Golden Millet. True Southern Grown Seed is worth double that of Northern or Western Grown, if you want a good crop of hay or seed. We have fully demonstrated that German Millet grown in the Northern and Western States becomes deteriorated, and soon resembles Fox Tail in quality and yield. This is due to the fact that German Millet is a partie of a warm glimate. man Millet is a native of a warm climate

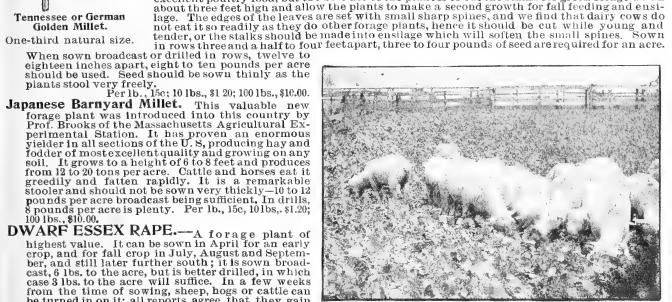

The True Tennessee Millet is planted in drills and cultivated with a view of getting the best results in quality and quantity of seed. Therefore, we have again secured this season a full supply grown expressly for seed, which we know will give the very best satisfaction to the 50c peck; \$1.50 bushel. farmer

SIBERIAN MILLET. Valuable for all sections of America. It is the greatest stooler valuable for all sections of America. It is the greatest stooler ever introduced. Six quarts will sow an acre. It is without exception the heaviest yielding millet, giving several times the yield of any other variety. It has been thoroughly tested in all sections of America and Canada, and the reports from different parts of this country prove that it will in time take the place of all other varieties. It does not grow rank or coarse, but the entire stalk is of such excellent quality that it is readily eaten. Although there are numerous blades, they are as fine as can be, making it of the greatest value to farmers everywhere. The various reports received from the drought stricken districts show that it will stand more hot dry weather than any other sort, and it has been known to yield heavily when other

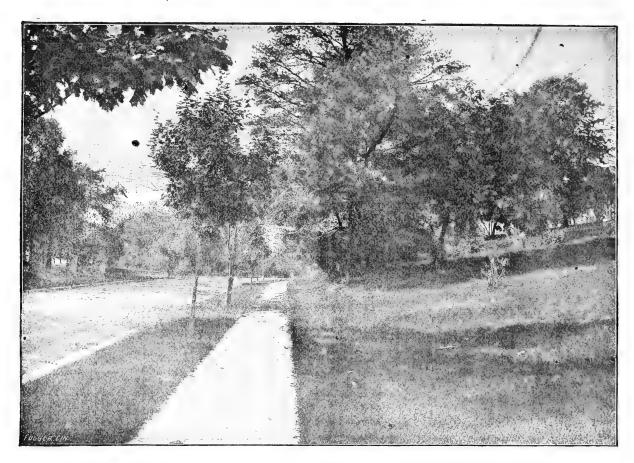

PEARL MILLET, or "Pencillaria." This quick growing forage plant has been long known under the name of East India or Cat-tail Millet". Sown in drills four feet apart and cultivated like corn the plants attain a height of eight to ten feet, with slender stalks and slender long-biaded leaves. These stalks can be cured for winter use and the seed makes an excellent poultry food, but the best use of the plant is to cut the stalks for green forage when about three feet high and allow the plants to make a second growth for fall feeding and ensilage. The edges of the leaves are set with small sharp spines, and we find that dairy cows do not eat it so readily as they do other forage plants, hence it should be cut while young and tender, or the stalks should be made into ensilage which will soften the small spines. Sown in rows three and a half to four feet apart, three to four pounds of seed are required for an acce.

DWARF ESSEX RAPE.—A for age plant of highest value. It can be sown in April for an early crop, and for fall crop in July, August and September, and still later further south; it is sown broadcast, 6 lbs. to the acre, but is better drilled, in which case 3 lbs. to the acre will suffice. In a few weeks from the time of sowing, sheep, hogs or cattle can be turned in on it; all reports agree that they gain weight faster on this than any other fodder, as it can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen. Dairymen

can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen, Dairymen and Farmers have proved its value. Lb., 10c; 10 lbs. 75c; 100 lbs. \$6.00

View of Lawn at "The Pines," Residence of Albert McCullough.

McCULLOUGH'S "Suburban" Lawn Grass Seed

Is a mixture of the finest Dwarf Evergreen Grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained. Our mixture is the result of several years experimenting, and, as we now offer it, it is unequaled; the immense quantity we annually sell is the best proof we can ofter. The quantity required for making a handsome lawn is four bushels (64 lbs.) per acre, or for renovating old lawns, two bushels, (32 lbs.) per acre. For a plot 15 x 20, or 300 square feet, one pound is required for a new lawn, or about half pound for renovation.

How to make a Lawn.—A fine lawn is an unfailing mark of intelligence and taste, to obtain which the main point is to start right. It is now a decided fact that seed will make a better lawn than turf or sod. The best soil is a good medium texture, neither very heavy or excessively light; the surface should be raked repeatedly, thoroughly pulverized, and smoothed to the desired grade; remove all large stones, roots and hardened pieces of earth that can not be readily broken. As portions sink, the hollows should be firmly filled, ample time being allowed for the thorough settling of the soil, which is greatly aided by a few heavy showers of rain, and at the best time for lawn making (April) these are usually sufficiently abundant. When the soil is firm, level and suitably moist, sow "Suburban" Lawn Grass Seed at the rate of four bushels (64 lbs.) per acre. One pound is sufficient to sow a small yard 15 x 20 feet, or 300 square feet. It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then give a thorough rolling or pat well with the back of a spade. The seed must be well firmed in the soil. When the young grass attains a height of three or four inches, carefully mow with a sharp scythe. After this, according to the season, it should be mown with a lawn mower every week or ten days. Each season the culitvated grasses after going to seed, lay dormant; at this time wild grass will appear to some extent but only for a short time, as it will succumb to the vigorous second growth of the other.

Renovating Lawns.—When your lawn has already been established, you will find it to your advantage to lightly re-seed each

Renovating Lawns.—When your lawn has already been established, you will find it to your advantage to lightly re-seed each season. As early as possible, carefully rake off all dead leaves, etc., and sow "Suburban" Lawn Grass Seed at the rate of two bushels (32 lbs.) to the acre; roll thoroughly or pat well with the back of a spade. To preserve a lawn in good condition, an annual dressing of El Paso Sheep Manure, or Pure Bone Meal, (500 to 600 lbs. to the acre) should be used.

Suburban Lawn Grass Seed.

Price: 1/4 lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 1 bu. of 16 lbs., \$3.00. If wanted by mail add 10c per lb. extra.

McCullough's Lawn Grass for Shady Places.—On nearly all lawns there are shady bare and unsightly spots on which the owners have difficulty in getting a stand of grass; for such places this mixture is adapted. It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour" or drainage defective, it is apt to be covered with moss. If such is the case apply some lime or land plaster to sweeten it, but the moss should first be removed by the use of a sharp rake, then sow the seed at the rate of four bushels (64 lbs.) per acre.

Price: 1 lb., 40c; 5 lbs., \$1.50; 1 bu. of 16 lbs. \$4.50. By mail 10c per lb. extra.

McCullough's Golf Link Grass Seed.—We have given much attention to grasses for Golf Links. The mixtures we offer below are composed of such varieties as will thrive here, and are the results of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on the Golf Links.

We have always on hand all the natural grasses of Europe and America, and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the Links may be for poor land or rich, high and dry, or low and wet.

Putting Green Mixture.—A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve the more it is tramped on.

Per lb., 30c; 5 lbs., \$1.40; 1bu. of 16 lbs., \$1.00. By mail 10c per lb. extra.

Golf Link Mixture. - For the grounds in general,

Per lb., 20c; 5 lbs., 80c; 1 bu. of 16 lbs., \$2.25. By mail 10c per lb extra.

McCullough's Terrace Mixture.—There is nothing more annoying than to have ground washed out. In this mixture we have put quick growing and deep-rooted grasses. Of course it depends a great deal on this being well started before a wash-out.

Per lb. 30c; 5 lbs., \$1.40; 1 bu. of 16 lbs., \$4.00. By mail 10c per lb. extra.

Postage. OUR PRICES INCLUDE POSTAGE ON ALL Seeds in Packets, Ounces and Quarter Pounds. Seeds offered in larger quantities are not prepaid. Half pounds supplied at pound rates; half bushels at bushel rates.

Special Rates on Vegetable Seeds in Packets.

To induce our patrons to form clubs to purchase Seeds in quantity, we will offer the following LIBERAL DISCOUNTS on Vegetable Seeds in Packets. Mailed postage paid.

These prices do not refer to seeds offered by weight or measure, but to seeds in PACKETS ONLY.

ARE DETERMINED TO SELL NOTHING BUT THE VERY BEST SEEDS THAT IT IS POSSIBLE TO PRODUCE.

ALL OUR PACKETS ARE WELL FILLED WITH THE BEST SEEDS.

ARTICHOKE.

Sow in April in rich soil, and transplant the following spring to permanent beds, in rows or hills, three feet apart and two feet between plants.

ASPARAGUS (Spargal, Ger.)

One Ounce will Produce 200 Plants. Five Pounds to the Acre.

N EARLY spring sow the seed, after soaking it twenty-four hours in warm water, in drills about one foot apart and one inch deep. The soil should be very rich and well worked. Later, thin plants to three or four inches apart in the rows, and cultivate often and thoroughly through the summer. The permanent beds should be prepared by deep plowing or spading, and thoroughly enriching the ground with stable manure or other fertilizers. If the subsoil is not naturally loose and friable, it should be made so by thoroughly stirring with a subsoil plow or spade. Make rows three feet apart and four inches deep, and set the plants in the bottom of the rows eighteen inches apart. Cover the roots about two inches deep. After the plants are well started, give frequent and thorough cultivation, and draw a little earth into the furrows at each hoeing until they are filled. Early the next spring, spade in a heavy dressing of manure, and one quart of salt to each square rod, and cultivate well until the plants begin to die down. The next season the bed may be cut over two or three times but if this is done all the short shoots, no matter how small, should be cut, and after the final cutting, give a good dressing of manure, ashes and salt. In the fall, as soon as the tops are ripe and yellow, they should be cut and burned. The plants may also be set in the fall, if the ground is so well drained that water will not stand on it. The quickest way to obtain a supply is to plant the roots. Two-year-old roots will insure the best and earliest results.

BEANS (Bohne, Ger.)—Dwarf or Bush.

Dwarf Green Podded Sorts.

One quart will plant one hundred feet of drill.

HE varieties of this class are tender, and will not bear much cold. Plant about the middle of April, if the ground is warm and the season favorable, and at intervals throughout the season for a succession, finishing about the 15th of August. The best mode of culture is in rows two feet apart, and the beans three inches apart and two inches deep in the rows. Keep well hoed, and draw the earth up to the stems, but only when dry; working them wet with rain or dew will cause them to rust and injure the crop.

BEANS (Stangen Bohnen, Ger.)—Pole or Running.

One Quart will Plant 150 Hills.

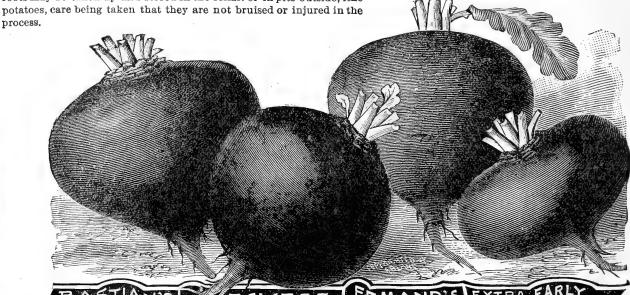

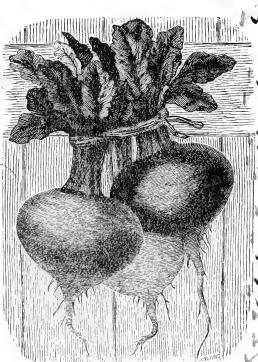

The planting of the various sorts of pole-beans should be delayed two weeks after the first planting of the early dwarf sorts. The Limas, being very tender will do better if not planted in the open ground before the middle of May. Plant in hills about three feet apart, and one to two inches deep, using five or six seeds to each hill, and set a pole firmly in the centre. Manure in the hill with well decomposed fertilizer. Thin the plants, leaving three in each hill. Many cultivators consider it best, in planting Limas and other flat beans, to place the eye down, claiming in this way that they will germinate more quickly. Lima Beans for early use may be grown in frames and transplanted. grown in frames and transplanted. McCullough's Extra Large Lima. The most buttery and delicious bean grown, both for market or family use.. 05 20 35 2.00 Seibert's Early Lima. The earliest of all the large Limas. Green, they are larger than any other variety. Vine is hardy and vigorous, continues in bearing longer than any other. Of better quality, a decided improvement in large Limas and cannot fail to become a favorite....... 05 20 35 2.00 Cut Short, or Corn Hill. Used among corn, the best for this section 05 15 25 1.75 White Creaseback. It is a good grower, and very productive. Pods five to six inches long, perfectly round, with a crease in the back. Exceedingly tender and sweet; skin, blood red; flesh, dark red...... 05 60 20 60 Early Blood Turnip. Flesh dark red color; a standard round variety, with small top...... 05 10 60 20 Bassano. (The Table Sugar Beet.) Very early, tender and 60 Long Dark Blood. An old standard variety, and a splendid keeper...... 05 10 60 60 Swiss Chard, or Spinach Beet. Cultivated for its leaves.. 05 10

BROCCOLI. (Spargle Kohl, Ger.)

Sugar Beets and Mangel Wurzels. See page 76.

BRUSSELS SPROUTS. (Sprossen Kohl, Ger.)

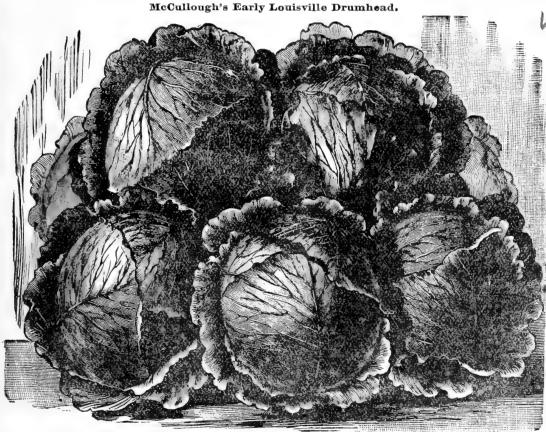

One of the most delicious vegetables, easy growth. Produces small heads resembling miniature cabbages. Are used as greens, very tender when touched by frost. Sow in May and manage as winter cabbage. In the fall the leaves should be broken down so that the little cabbages will have room to grow.

CABBAGE (Weisskopf Kohl, Ger.)

One ounce will produce 1,500 plants. Quantity to transplant one acre, one-half lb.

HE early varieties of Cabbage are cultivated more extensively than any other vegetable. In latitudes where the thermometer never indicates 20° below the freezing point, seed may be sown in the open border in October, and planted out on the first opening of spring; but in the Northern States they must either be sown in hotbeds in February, or, what is still better, wintered over in cold-frames; for this purpose, the seed is sown from the 10th to the 20th of September. Attention to date is important; if too soon the plants might run to seed, and if too late they would be too small. In four or five weeks from the time of sowing they will be fit to transplant into the cold-frames. In planting, it is very important with Cabbage or Cauliflower, that the plant is set down to the first leaf, so that the stem is all under ground, for, if exposed, it will be split by the action of the frost, and will be injured in consequence. The plants are usually set out from the middle of March to the middle of April, in rows about two feet apart and eighteen inches between the plants in rows. The earliest crop matures in June. For second early, the early kinds should be sown first week in April, and planted out in May. The crop should mature in July and August. The late varieties are usually sown in the early part of May, and the plants are set in July, at a distance of three feet between the rows, and two feet between the plants. This crop matures September, October, or November. Cabbage should not follow cabbage successively. The late plants are subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To preserve the plants, sprinkle them with wood ashes, air-slacked lime, plaster, slug-shot or tobacco dust, early in the morning while the plants are wet with dew. with dew.

Our Seed is grown from selected heads, and saved from center shoots.

iety; while, if planted later, it makes excellent heads for winter. The quality is very

McCULLOUGH'S

Originated in this market and is now the principal mar-ket variety all through this part of the country. CAULIFLOWER.—(Blumenkohl, Ger.)

McCullough's Earliest Dwarf Erfurt Cauliflower.

McCullough's Earliest Dwarf Erfurt. This has become the more popular, market gardeners grow it entirely

OUR SPECIALTY.

One Ounce of Seed for 1000 Plants.

OW for early use about the middle of September or October, in a bed of clean, rich earth. Transplant in frames and cover with sashes and shutters during severe weather, giving them light and air every mild day. When this is not practicable, they may be had nearly as well by sowing the seed in a hot-bed in January or February, and when the plants are large enough transplant three inches apart in boxes, or in other hot-bed, until time to plant out. If hardened off, they are seldom injured by planting out as early as the ground can be properly prepared, 2½ feet apart each way. Keep them well hoed, and bring the earth gradually up to their stems, watering freely in dry weather, and especially when they begin to head. The Cauliflower succeeds best when planted in frames at the close of winter and brought to maturity before the summer heat sets in. The late varieties mature in the autumn, and are sown and managed similar to winter Cabbage.

Special Prices given to Market Gardeners and others who use large quantities of Seed.

Pkt. 1/40z. 1 oz.

CELERY.—(Sellerie, Ger.)

One Ounce will produce about 2,500 Plants.

O grow early Celery, sow the seed late in March in a hot-bed or box, and for later crops, in the open ground, as soon as the weather becomes warm, cover lightly, or better still, roll or press it in. Shade the young plants for a week or ten days, and do not let the soil dry out. The tops may be shorn off once or twice before planting, so as to insure "stocky" plants, which will suffer less on being transplanted. When from four to six inches high, transplant into broad, shallow trenches, or on the level ground, setting the dwarf sorts into rows three feet apart, and the tall varieties four feet apart, and six inches apart in the rows. The soil should be light, highly manured, partially shaded and moist, or near water, as the plants must be freely watered in dry weather, but it should not be put directly on them. Earthing up checks growth, and should not begin until quite well grown, then earth up gradually, keeping the leaf stocks close together, so that the soil may not fall into the center of the plant, but never earth up in wet weather, nor when dew is on them. That intended for winter and spring use needs little banking; when stored for winter it will naturally bleach beautifully white.

Many Heart. See Specialties, 5c pkt., 30c oz., 85c 1/4lb. Shumacher. See Specialties, 5c pkt., 20c oz., 60c 1/4lb.

eaming Yellow. Ears of good size, cob red and small. A strong grower and very prolific......35c peck, \$1.00 bu. Leaming Yellow.

Hickory King. A distinct White Dent Field Corn. The stalks are strong, and bear two and occasionally three ears; the cob is remarkably small. It is very productive and of good quality. quality...... 40c peck, \$1.15 bu.

Blunt's Prolific. A prolific white variety producing four medium sized well filled ears to the stalk... 40c peck, \$1 25 bu. King Phillip. (Reddish Flint.) One of the best and most re-

ongfellow. A popular and well-known, yellow, eight-rowed Flint variety. Ears from ten to twelve inches in length. Very early and an abundant yielder......40c peck. \$1.25 bu.

Red Cob Ensilage. A Southern type of large white corn, with deep red cob, strong leafy stalks and short joints. Adapted to all sections of the country, and a general favorite with thousands of dairy farmers..........\$1.00 bu. \$9.00 for 10 bu.

Sweet Fodder. There is nothing better for green feed, or curing for winter, than sweet corn. Cattle highly relish it, and when fed on it, keep in fine condition and give an abundance of milk. It has the great merit of being so sweet and palatable that cattle eat every part of the stalks and leaves, and consequently none is wasted. Also excellent for soiling. Sow thickly in drills or broadcast at the rate of two to three bushels per acre...... 50c peck, \$1.75 bu., \$3.20 for 2 bu.

CUCUMBERS. (Gurken, Ger.)

One Ounce of Seed for Fifty Hills.
Two Pounds for an Acre.

OR early use sow in hot-houses on small sods over-turned, or in small pots plunged in earth. As soon as danger from frost is over transplant with sod, so as not to disturb the plants, into hills in the open ground. For general crop sow from about the first to the middle of May in rich, mellow, warm soil. Use a shovelful of well-rotted manure in each hill, and cover it two inches deep with fine earth. On this sow the seed, about eight or ten seeds to a hill; cover one-half inch with earth and press down. When danger from bugs is past, thin out to four plants to a hill. For pickles, plant from June to middle of July. Always pick the fruit when ready, even if not needed, otherwise the productiveness of the vine is destroyed.

destroyed.

English Forcing Cucumber.

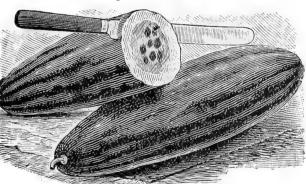

The best for forcing, attaining a length of twenty to thirty inches. They can be grown in hot-beds, where the temperature does not fall below 65° at night.

HORSE RADISH.

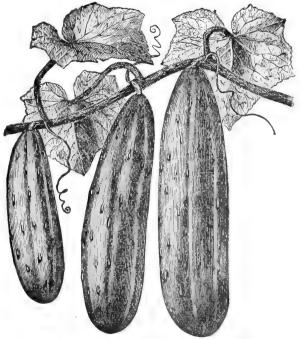

The best Horse Radish is produced from small pieces of roots four or five inches in length. These small roots will produce good Radish fit for use in one season's growth. Plant the set small end down, where the slanting cut is, so that the top will be two inches under the soil. The soil should be very rich and well cultivated. It is hardy and may be left in the ground until spring before digging. By express (not paid), 15c dozen, 75c per hundred. If by mail, add 10c to per dozen extra.

Evergreen Cucumber.

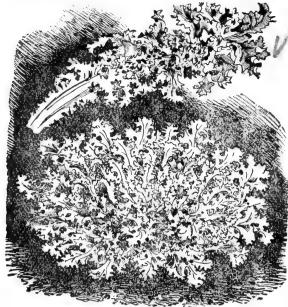

Cool and Crisp.

Long Green.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by Mail, postage must be added to prices quoted at the rate of ten cents per Pound and sixteen cents per Quart.

Green Curled Endive.

EGG PLANT

(Eierpflanze, Ger.)

One ounce will produce about 1,000 plants.

VERY tender plant, the seed requires the strongest heat. Sow in a hotbed early in spring, when the plants are two inches high, transplant. Plant out when the weather becomes settled and warm. Give them a deep, rich soil; full exposure to the sun. When they germinate they are sensitive to damp and being chilled, the amateur often fails to raise them, even with his own hotbed. To obviate this we will have a supply of strong potted plants from the middle of May to the first of July.

New York Improved.

Pkt. Oz. 1/4 lb. Lb.

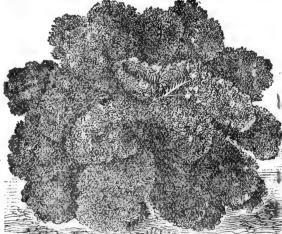

1.50

ENDIVE. (Endivien, Ger.) One Ounce of Seed to 150 Feet of Row.

NE of the best and most wholesome salads for fall and winter use. Sow in shallow drills in April for early use, or for late use in June or July. When two or three inches high transplant into good ground, or thin out to one foot apart. When nearly full grown, they must be blanched. This is done by gathering the leaves together, and tying with yarn or bass, to exclude the light and air from the inner leaves, which must be done when quite dry, or they will rot. Pkt. Oz. 1/21b. Lb. 05

KOHL=RABI. (Turnip Roone ounce of Seed for 1,500 plants. (Turnip Rooted Cabbage.)

Pkt, Oz. ¼1b. Lb. 05 20 70 2.25

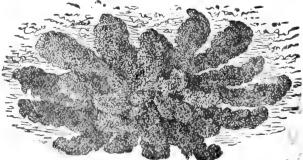

Norwood Kale.

Kale or Borecole. (Blaetter-Kohl, Ger.)

One Ounce to 100 Yards of Drill.

HE Kales are more hardy than Cabbage, and make excellent greens for winter and spring use, and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early spring use, sow in September, and protect during the winter.

Norwood Dwarf Curled. A beautiful curled and Pkt. Oz. 1/41b. Lb. crimped sort, of strong, vigorous habit, attractive appearance and a bright green color. It is superior to all other sorts, and is, undoubtedly, the best for private gardens. It rarely exceeds twelve inches in height, but spreading out under good outlivesion to two fact in 75 10 20 40 10 25 65 decorative plant.....all Scotch. Leaves green, beautifully curled and wrinkled; grows about two feet in height, hardy; be-65 ing improved by frost.....

Dwarf Curled German Kale.

LEEK. (Lauch, Ger.)

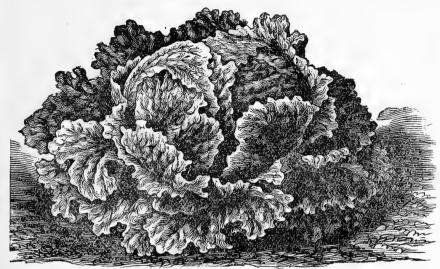

OW early in April, in drills one foot apart, and one inch deep. When the plants are six to eight inches high, transplant in a deep rich soil in rows twelve inches apart and six inches in the rows, as deep as possible, so that the neck may be covered also be sown in August or September, and the young plants transplanted in the string. planted in the spring

Grand Ray McCullough's sons, cincinnati, o.

LETTUCE—(Lattich oder Garten Salat, Ger.)

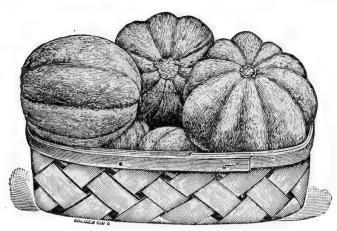

One Ounce will Sow 150 Feet of Drill.

ETTUCE thrives best in rich, moist ground. For the principal early crop, sow the seed in September in the open ground; transplant, when large enough, into cold frames, and protect the plants during the winter in the same manner as early Cabbage; set the plants out early in April, or sow the seed in hotbeds in February or March, and transplant into a sheltering border with a southern exposure. For successive crops, sowing may be made in the open ground as early as the spring opens, and continuing until July. Always thin out well, or the plants will not be strong. When wanted as a cut salad, sow the seed thickly in rows or broadcast.

McCullough's Nonpareil.

HEAD VARIETIES.		_		
McCullough's Selected Nonpareil. The finest market variety to be found. Its beautiful yellowish-green color, crimped, curled, and well-formed heads, tender quality and sweet flavor, place it at the head of the list for the market gardener or for family use. It withstands the heat of summer and retains its sweetness for a longer time than any other variety we know			-	1.00
Big Boston. Resembles the popular Boston Market, but is nearly twice as large; desirable for forcing in frames and for spring and fall outdoor planting	05	20	50	1.25
Boston Market. This is an improved variety of the Tennis Ball, and attains a large size. It grows very compact, is white and crisp, and is one of the very best varieties for forcing	. 05	15	40	1.00
Brown Dutch. A dark, brown-spotted variety, remarkable for its hardiness. The inner leaves are beautifully blanched, and very sweet and tender	05	15	40	1.00
Yellow Seeded Butter. See specialties Be sure and try it	05	15	40	1.00
Defiance Summer. A large-growing cabbage Lettuce, unexcelled as a long-standing sort. The leaves are of light green color, and it remains for a long season tender and crisp		15	40	1.00
Denver Market. This Lettuce is highly recommended, either for forcing or open ground; forms large solid heads of a light green color; is slow to seed. The leaves are curled and crimped, very crisp and tender	05	15	40	1.00
Hanson. Heads green, with white heart. Large size, crisp and tender	05	15	40	1.00
Salamander. One of the best for summer use, forming good-sized, compact heads. Color, light green outside, and white inside	05	15	40	1.00
Silver Ball. This is one of the best all-the-year-round Lettuce. It is an excellent variety, as well for early spring and summer use as for winter forcing. The heads are silvery white, very firm and compact	05	15	40	1.00
Tennis Ball, Black Seeded. A favorite forcing variety, forming a large head. It makes but few outer leaves, and for this reason can be planted quite closely under glass		15	35	1.00
Tennis Ball, White Seeded. The sort so extensively grown for forcing and heading under glass; good size, firm heads and very white and crisp	05	15	35	1.00
CURLED VARIETIES.				
Norwood. One of the best loose leaved early market varieties, consequently very profitable for market gardeners. It makes a good show; light, creamy white leaf. Very tender when grown early	05	15	40	1.00
Black Seeded Simpson. One of the most popular sort. It forms large, loose leaves of ideal color: the leaves are large, thin, very tender, and of very good quality. It is one of the best sorts for use under glass as well as for early outdoor planting. Our seed of this has been most carefully selected, and we sell large quantities to market gardeners	05	15	40	1.00
Early Curled Simpson. Does not head, but forms a close, compact mass of leaves; very early, excellent for forcing		15	40	1.00
Grand Rapids. As a Lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list, being of quick growth, little liable to rot and standing for some days after being fit to cut. The plant is upright, and forms a loose head or cluster of large, light yellowish-green leaves, slightly crimped and blistered and rather thin, which will stand shipping long distances better than most sorts

Extra Early Hackensack.

MELON-Musk.

(Zucker Melone, Ger.)

One Ounce will Plant about Sixty Hills. Two to Three Pounds in Hills per Acre.

N SELECTING a patch for Melons, be careful to have it at a safe distance from your Squashes, Cucumbers, Pumpkins, etc., or they will certainly mix. In preparing the hills fork in plenty of manure, and about the middle of May, when the ground is warm, plant in each hill eight or ten seeds, and cover half an inch deep. After the danger from bugs is over, pull all but three or four of the strongest plants. As soon as the vines have run sufficiently and spread their branches, stop them by pinching the top off the first running bud. This will strengthen the plants, and promote their perfecting fruit early. The ground should be kept free from weeds and frequently cultivated.

quonity cultivated.

Rocky Ford. A variety extensively grown in Colorado and shipped to various Eastern points. The reason for the wide-spread popularity of these melons is two-fold. First, its superb table qualities, being firm, sweet and remarkably solid. Second, its wonderful shipping quality, which enables it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juicy. It is very early and wonderfully

sweet and a delicious flavor...... 05 10 25 80

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted: Half-Pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by Mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

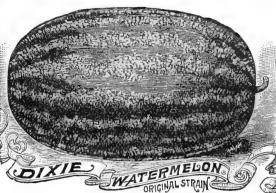

Princess

MELON-Water. (Wasser Melone, Ger.)

One Ounce for 30 Hills, 4 to 5 Pounds in Hills for an Acre.

In order to raise Water Melons, a rich, sandy soil, or a sandy loam, is required. Prepare, plant, and manage it the same as Musk Melons, only have the hills a greater distance apart—say seven to eight feet away. If large Melons are desired it is well to pinch off all but two or three from each vine.

MUSHROOM SPAWN. (Champignon Brut, Ger.)

One pound will spawn about ten feet square. If ordered by mail, add ten cents per pound for postage.

Mushrooms.

by the best maker in England especially for our trade) has gained an enviable reputation among critical growers for its uniform

Okra, or Gumbo.

(Ocker, Ger.)

It is of the easiest culture, and grows freely, bearing abundantly in any garden. Sown at the usual time of all tender vegetables, in drills two inches deep, setting

all tender vegetables, in drills two inches deep, setting the plants from two to three feet apart.

White Velvet. The pods are round and smooth, and are much larger than those of any other Okra, are never prickly to the touch, and are produced in the greatest abundance. 5c pkt., 10c oz., 25c ½ 1b., 6c clb. mproved Dwarf Green. This variety has long, slender pods, very early, productive, and only grows fourteen inches high. 5c pkt., 10c oz., 25c ½ 1b., 60c lb.

One Ounce for 100 Feet of Drill. Six Pounds for One Acre. Onion Seed for Sets, 30 10 40 Pounds Per Acre.

OR sets, sow the seed as early as possible in the spring, very thickly, in drills. As soon as the tops die off in summer, remove them to a dry, airy place; and early in the following spring re-plant by placing the sets in shallow drills twelve inches apart, and about four inches apart in the drills; the onions, by this process, are obtained of a large size early in the season. They may also be grown to full size during the first season by sowing thinly in drills one foot apart, and about 1/4 inch deep, in March or early in April, in strong land, well manured, and thinning them out to stand three or four inches apart in the drills. They delight in a strong, rich deep, loamy soil, and succeed well if grown suclight in a strong, rich, deep, loamy soil, and succeed well if grown successive years on the same ground.

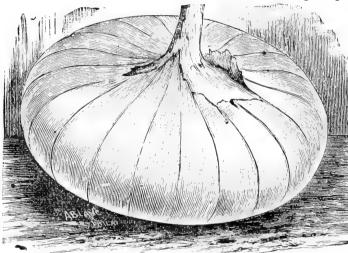

By sowing Onion Seed in frames in February or March, and transplanting in April, onions of immense size can be obtained. For this purpose the varieties Southport Globe (white, yellow or red) and Prizetaker are

usually preferred. Mammoth Silver King. Single onions of this vari- Pkt, Oz. 1/4 lb. Lb. ety, grown from seed the first season, have weighed as much as three pounds. It matures early, is a white-skinned and white-fleshed variety, flat shape, and of a mild and delicate flavor.

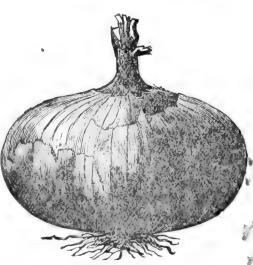

Australian Brown. See Specialties

Yellow Globe Danvers. This is the standard variety everywhere, its earliness, uniform shape, small neck, bright yellow color and fine quality commend it to all. It is an excellent keeper and one of the most desirable sorts. 2.00 15 1.00 40 05 desirable sorts 1.20 15 40 10 35

ONIONS—Continued.

		Oz.	1/1b	. Lb.
White Portugal, or Silverskin. A large, flat onion of mild flavor; fine for early winter use, and much esteemed for pickling. Large White Globe. This is one of the finest onions in cultivation, both in appearance and quality. It is	05	20	50	1.75
large, globe-shaped, firm, fine grained and of excellent flavor, and commands a higher price in the market than any other white onion grown	05	20	75	2.40
White Barletta. A very early, small, pure white variety, having a very delicate silver skin, flesh firm and mild in flavor. Its great merit over all others is its extreme earliness. For pickling purposes it is unequaled.	05	20	65	2.25
The Queen. A handsome silver-skinned variety; esteemed for its rapid growth, mild flavor and fine keeping qualities. Prize Taker. A large beautiful Onion that is seen every fall offered for sale at the fruit stores in Cincinnati	05	20	65	2.25
and other large cities. They are a rich straw color of enormous size, averaging 12 to 14 inches in circumierence. It is very hard and an excellent keeper	05	20	50	1.50
Mammoth Pompeii or Giant Red Garganus. This fine Italian variety has produced Onions weighing 4 to 5 lbs. each. The skin is a delicate red, flesh close grained, nearly white, and of a very mild flavor	00	20	60	1.75
Large Red Wethersfield. The most popular red variety for main crop. It makes a large, thick bulb, crops abundantly, ripens early and sells readily on all markets where a red onion is wanted. Our seed is extra selected.	05	1 5	40	1.25

ONION SETS.

These are valuable for early use, and where onions from seed cannot be raised the first year.

raise onion sets from seed, use good ground prepared as for large onions, and sow the seed very thick in broad drills, forty to sixty pounds per acre. If the seed is sown thin, the bulbs will not only be too large for sets, but will not be of the right shape, and if sown thick on poor land, they will be necky or bottle-shaped. When onion seed is sown for sets the seed may be planted somewhat later than for large bulbs, but fine crops are more likely to come from early sowing.

Onion Sets should be planted out as early in spring as the ground is dry enough to work; plant them in sone foot apart, with sets three or four inches apart. When raised from sets the onions can be used in rows one foot apart, with sets three or four inches apart, the green state in June, or they will be ripened off by July.

Our Onion Sets have been kept in good condition, and are recleaned.

White Sets. Yellow Sets. Potato Sets. Top or Button Sets. White Multiplier Sets. 30 cents per quart by mail postpaid. Price per peck and bushel on application.

PARSLEY—(Pétersilie, Ger.)

One Ounce to 150 Feet of Drill.

SED for garnishing and seasoning soups, meats, etc. Suceeds best in a mellow, rich soil, Sow thickly early in April, in rows one foot apart and one-half inch deep; thin out the plants to stand six inches apart in the rows. The seed is of slow germination, taking from three to four weeks to make its appearance, and often failing to come up in dry weather. To assist its coming up quicker, soak the seed a few hours in warm water or sprout in damp earth, and sow when it swells or bursts. For winter use protect in a frame or light cellar. weather.

PARSNIP--(Pastinake, Ger.)

One Ounce for 200 feet of Drill, 5 to 6 Pounds for an Acre.

PEPPER—(Pfeffer, Ger.)

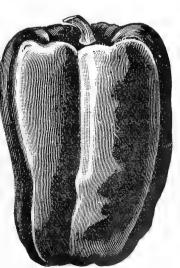

One Ounce of Seed for 1,500 Plants.

OW early in the spring in hot-beds, if possible, and transplant to the open ground when the weather is favorable, or sow in drills in warm, mellow soil, late in the spring, and then thin out so as to stand eighteen inches apart. For the convenience of those who only desire a few plants, and do not wish the trouble of starting them, we will have a supply of strong, healthy plants in pots ready by the middle of May.

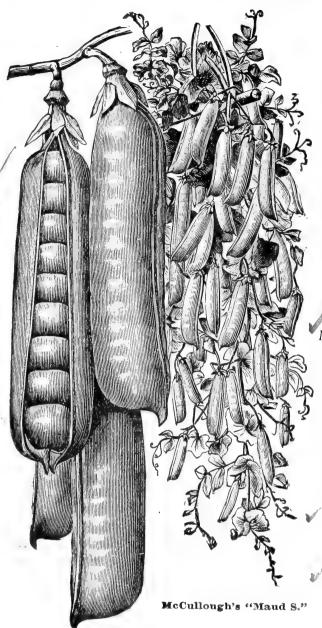

New Celestial. It is not only a most useful Pepper, but one of the most beautiful plants in existence. The plant begins to set in peppers early in the season, bearing profusely. The peppers are two or three inches long, of clear, sharp flavor. Color, creamy yellow, and, when fully grown, changes to an intense vivid scarlet. 2.40 75 Golden Dawn. Of same shape and size of Large Bell, but of more delicate flavor; color, yellow.

Large Bell, or Bull Nose. Large and early, rind very thick, color, gloss-red, flavor, mild and pleasant.

Long Red Cayenne. From 3 to 4 inches long, of bright-red color, very productive and hot 75 2.40 75 2.40 75 2.40 25 75 2.40 25 75 2.40 75 2.40 PEANUTS. For seed 15

PEAS. (Erbsen, Ger.)

One Quart to 100 Feet of Drill. 11/2 Bushel per Acre.

EAS succeed best in light, dry, loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used, let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold, and must be planted later. Sow all the varieties quite early, and depend for succession upon the different times of ripening of the various sorts, or from the first sowing, sow every two weeks until June for a succession. After that there is danger of mildew. Discontinue then until August, when a planting of extra early or early sort will often produce a good crop. Sow the seed in single drills, three feet apart for dwarf sorts, and four for tall sorts, or in double drills six or eight inches apart, one inch apart in the drill. and not less than four inches deep, or for the late sorts seven to and not less than four inches deep, or for the late sorts seven to eight inches deep, since deep planting prevents mildew and prolongs the season. Cultivate well, and draw the earth twice to the vines during growth. Stake the tall varieties when they begin to vine. Pick the pods as soon as fit, and allow none to ripen on the vines, as they will then cease bearing.

Wrinkled varieties are marked thus*

Extra Early Varieties.

MAUD S.—The Earliest and Most Prolific Pea Known. several years past, we ourselves, and also many of the largest and most experienced truckers, have made comparative trials with other leading brands of extra early Peas, and in every case MCCUL-LOUGH'S MAUD S. was the first ready to pick by from three to five days. The pod is of a dark green color, of a full round shape, and days. The pool is of a dark green color, of a full round shape, and of strong texture, which especially fits it for shipping long distances. It does not require stakes or brush of any kind for support. It is an even cropper, and can be gathered clean in two pickings. For a late fall crop it has few equals, and is the market gardener's favorite for all seasons. The far northern point at which our Peas are grown renders them almost proof against cold, and the best for early spring or late fall crop. Thousands of market gardeners have pronounced this Pea UNEQUALED IN EARLINESS, YIELD AND REGULARITY OF GROWTH, and in every sense a perfect trucker's pea. Make first planting as early in the spring as the ground will permit, and cover Pkt. Pt. Qt. Peck. Well. 65 15 25 \$1.50

America as well as most desirable for the mar-05

of the small round extra earlies. It is the earliest large-podded pea in cultivation, while the peas are of most superior quality, both in size and delicious flavor. The vine has heavy ing four to four and one-half inches long, nearly round, and well filled with large, handsome peas.

American Wonder. This variety stands unrivaled in point of flavor and quality. It is dwarf, and robust in habit, growing from ten to fifteen inches in height, according to the soil.

McLean's Little Gem. A green wrinkled variety. It grows from twelve to eighteen inches high, is very prolific and of excellent flavor.

Tennessee Sweet Potato Pumpkin.

RADISH—(Rettig, Ger.)

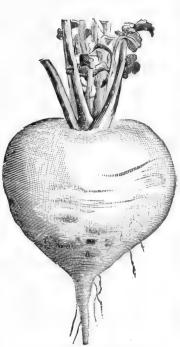

One Ounce to 100 Feet of Drill. 8 to 10 Pounds for an Acre.

Radishes thrive best in a light, rich, mellow soil, they must make a quick and tender growth; heavy or clay soils not only delay their growth, but produce a much inferior crop in appearance and flavor. Sow for very early use in hot-beds during the winter or early spring, or later on in sheltered borders, in well-manured, deeply dug, and finely-raked soil; if not well-stimulated into a rapid growth they become fibrous and tough. Sow in drills ten inches apart, and thin to two inches in the rows. Sow at intervals of two or three weeks until September for a succession. The winter varieties should be sown in July and August; like the Turnip, they make the best growth in the autumn, and must be taken up before severe frost, and stored away in a cool cellar in sand.

McCullough's Cincinnati Market.

Much grown by the Cincinnati market gardeners, and the handsomest long radish in cultivation. It is a glossy scarlet, very small top, grows seven inches in length. Skin, very thin; flesh, crisp and brittle and of a delightful pungent quality. Undoubtedly the finest long red Radish for forcing, and will outsell any on the market, also an extra fine sort for

WINTER

SPINACH.

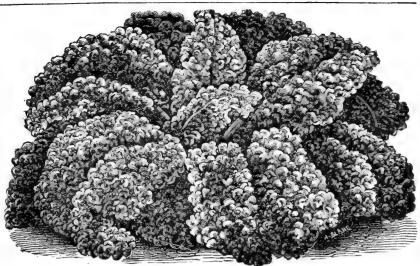

(Spinat, Ger.)

One ounce for 100 feet of drill, 10 to 12 pounds for an Acre.

For spring and summer use, sow either broadcast or in drills as early as the ground can be worked. The fall sowing is the main one with our market gardeners, which is done from August to October, and by careful attention they have it in marketable condition throughout the entire winter and spring. If the land is dry, the seed should always be rolled or tramped in, for if the soil is loose, the hot air shrivels the seed, so that it will not germinate.

Norwood Savoy. One of the best for either the market or kitchen garden. A quick-growing, round-seeded variety, producing a remarkably thick, dark green, slightly crumpled leaf, suitable for either spring or following. fall sowing.

Pkt., 5e; oz., 10c; 1/4 lb., 20c; lb., 35c. Bloomsdale Savoy. The hardiest large Savoy leaved; curled and crimped with thick, fleshy leaves, good for family and market purposes.

RHUBARB. (Rhabarber, Ger.)

Sow in April in drills eighteen inches apart, and cover the seed with fine soil, pressing it down firmly. When the plants are strong enough, thin out to six inches. In the fall or following spring, transplant the roots into deep, rich soil, three feet apart 1/41b. Lb. 50 \$1.50 each way. Pkt Oz. Linnaeus. Best sort for general purposes, early, large and tender. 05
Yictoria. Very large, later than Linnaeus. 05 15

SALSIFY. (Hafer—Wurzel, Ger.) One Ounce will Sow 50 Feet of Drill.

ALSIFY is rapidly coming into favor, and is considered a most delicious vegetable. It is used stewed, boiled, or fried, and sometimes as a salad, sliced raw in vinegar, with salt and pepper. When cooked, it has an oyster flavor. It is commonly called vegetable oyster. The cultivation is precisely the same as directed for parsnips; and it will keep over winter, in the ground where grown, in the same way as parsnips.

Pkt. Oz. 1/41b. Lb. ½1b. Lb. 25 90

10 15 1.25

SQUASH. (Kurbiss, Ger.)

One Ounce of the Bush Varieties for Forty Hills, or of the Large-Seeded Kinds, Fifteen Hills. Two or Three Pounds of the Bush, and Three to Four Pounds of the Large-Seeded for an Acre.

Is useless to sow until the weather has become settled and war n. Light soils are best suited for its growth. Prepare hills for the seeds by incorporating two or three shovelfuls of well-rotted manure with the soil for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants, after which cultivate same as cucumber.

Summer Varieties.

Pkt. Oz. 1/4lb. Lb pan, and bearing an abundant crop.

Early Yellow Bush. An early, flat scallop shaped variety; color yellow; flesh pale yellow and well flavored; very productive; used when young and tender.

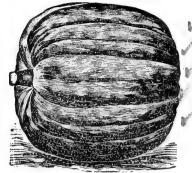

Summer Crook-Neck. The old standard sort; very early and productive. Fruits about one foot long, with crooked neck, and covered with warty excrescences; color bright yellow; shell very hard when ripe.

Straight-Neck Summer Squash. Market gardeners who ship early squash to distant markets, know the difficulty of packing the crook-neck variety in boxes to good advantage. They do not fit into the space well, the crooked neck always seeming to go just where it is not wanted. In the "Straight-Neck," the bad feature of the crook has been overcome, and by continued selection the size has been increased, more uniformity in shape secured, and quality improved. 10 25 10 25 75 10 25 75

Pints, Quarts, and larger quantities if to be sent by Mail, postage must be added to prices quoted at the rate of ten cents per Pound and sixteen cents per Quart.

ADHA SHAIRA

TOBACCO.

HE seed should be sown as early as possible after danger of frost is over.

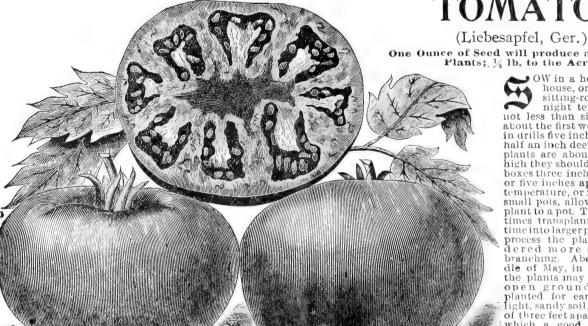

A good plan is to burn a quantity of brush and rubbish in the spring,
on the ground intended for the seed bed, then dig and thoroughly pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When the plants are about six inches high, transplant into rows four or five feet apart, and cultivate thoroughly with plow and hoe.

and is easily cured to the brightest color.....

ГОМАТО

One Ounce of Seed will produce about 2,000 Plants; 1/4 lb. to the Acre.

> OW in a hot-bed greenhouse, or window in a sitting-room, where night temperature is night temperature is not less than sixty degrees, about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high they should be set out in heaves three implies deep four boxes three inches deep, four or five inches apart, in same temperature, or removed into small pots, allowing a single plant to a pot. They are someplant to a pot. They are some-times transplanted a second time into larger pots, by which process the plants are ren-dered more sturdy and branching. About the mid-dle of May, in this latitude, the plants may be set in the open ground. They are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in three feet apart, in hills in which a good shovelful of rotted manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the

feet apart. Water freely at the For late use, sow in a sheltered border under glass. By training the time of transplanting, and shelter from the sun a few days until the plants are established. For late use, sow in a in May, and set out the plants in July; the green fruit can be picked off before frost, and ripened under glass. tomato vines on trellises, or tying to stakes, they will increase in productiveness, the fruit will ripen better, and be of finer quality.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds Pints, Quarts, and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

TOMATO—Continued.

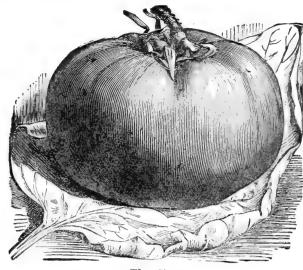

Magnus.

Pkt. Oz. 1/4lb. Lb Acme. One of the earliest and handsomest. Fruit medium size, perfectly smooth, and regular in shape. Very solid, and a great bearer. Color, dark red, with a purple tinge 05 25 70 2.00 Atlantic Prize. See Specialties, 25 70 Buckeye State. The tomatoes are borne in immense clusters of four to eight large fruits. In time of ripening, it matures with the "Stone." In solidity and meatiness, it has no equal, while in luscious quality none surpass it. The color is much the same as "Beauty," but of a somewhat darker and richer shade, and this together with its very large size and clear-cut outlines, makes very showy and striking when 80 2.50 displayed for sale...... 05 Beauty. Rich, glossy crimson, with a slight purple tinge. The fruit grows in clusters of four to five, is of large size, very smooth, and retains its character till late in the 25 70 2.00 Cincinnati Purple. A valuable variety, especially adapted for canning and shipping. It is very large, color, a dark purplish-red. 25 70 2.00 Very productive, and of rich flavor 05 Dwarf Champion. The vines are dwarf and compact in habit, grow stiff and upright, with thick and short-jointed stems. It is remarkably early, ripening fruit as early as July 1st. It will yield double the quantity of extra early fruit per acre that can be obtained from any other Tomato. In form and color the fruit closely resembles the Acme.......05 **30** 90 3.00 Enormous. The largest smooth bright red tomato yet produced. The tomatoes are usually round in form, four to five inches in diameter, thick through, and solidly meaty, with small seed-cells. The skin is smooth, highly colored, and free from cracks. In the "most enormous" fruits the form is oblong as though two were joined together. Of strong growth and immensely productive...... 05 35 1.00 avorite. One of the largest. Ripens evenly and early, and holds its size to the end of the season. It is very prolific, has few seeds,

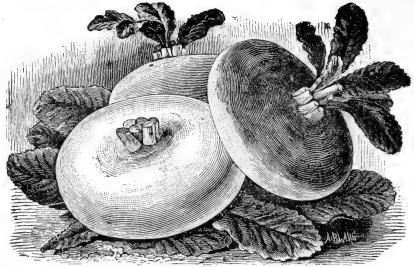

solid flesh; bears shipping long distances... 05

TURNIP.

(Ruben, Ger.)

One Ounce will Sow 150 Feet of Drill, 1 to 11/2 lbs. to the Acre Drilled or Broadcast.

The soil for Turnips should be rich and mellow. For an early crop, sow early in the spring, in drills about a foot apart, or broadcast and thin out. For a general crop, sow from the first of July to the last of August, in drills eighteen to twenty inches apart, and thin out the plants to 8 or 10 inches. To destroy the fly, which is very destructive to the turnip crop, use "Hammond's Slug Shot." Sow an abundance of seed, and thin out. Should the crop be destroyed, harrow the ground immediately and sow again.

HERB SEEDS.

Sow early in April or May, in a sheltered, well-prepared spot in the open ground, either broadcast or in shallow drills about seven inches apart. Thin out the plants thus raised, and keep clear from weeds. A few sweet aromatic and medicinal herbs are very valuable for flavoring soups, etc., and care should be taken to harvest them properly on a dry day, as they come into full blossom, then dry quickly and pack closely, entirely excluding the air.

DIRECTIONS FOR THE CULTIVATION OF FLOWERS FROM SEED.

ANNUALS are plants which flower, produce seed, and die the same year they are sown; Biennials, those which are sown one year, bear their flowers and seeds and die the next; under the term "Perennials" are classified those which grow and flower for several years; and included in one or the other of these classes are hundreds of floral gems. These three classes are each again divided into hardy and half-hardy sections, and, as they require different modes of treatment for their successful cultivation, the few details we give under each heading may be useful to those who have had but little practice amongst them.

HARDY ANNUALS are such as can with safety be sown in the open ground, requiring no protection; they will grow in almost any ordinary garden soil, and, if judiciously selected and sown in succession, they are capable of yielding a profusion of flowers, equal in many respects to the "summer bedders" which often occasion so much anxiety and care. The object to be aimed at in the culture of Annuals should be a steady and fairly vigorous growth, the desideratum being flowers and plenty of them, and not an over-luxuriant growth with a scarcity of blossoms, as is nearly always the result of a too liberal application of manure.

Sow in April or May, either in their permanent place in the open ground, or in shallow boxes two or three inches deep, placed in a warm window, or in a hot-bed, the latter method being generally preferable, as plants grow hardier by being transplanted. The selection of the soil is a very important point; a light, rich, sandy loam, not too wet or too dry, makes the best seed-bed, and is often improved by the addition of a little pulverized charcoal. Smooth the surface before sowing, cover the seed with sifted earth, and keep the soil always moist.

The absolute essential of successful flower growing is not to bury the seed too deep. The very best of seed can not grow when choked with soil. Amateurs fail here oftener than at any other point, and the seeds and the seedsmen are unjustly blamed for the failure. Generally, seeds should not be covered to a depth greater than two or three times their diameter. Fine seeds, such as Portulaca, etc., ought not to be covered at all, or but slightly, pressing it down with a strip of board. Sun and light must be excluded from the newly sown seed—cover with paper held down by sticks or stones until the seed has germinated, and then admit gradually the air and light. Knowing the height and general habit of the plant, thin accordingly, always leaving sufficient space between them for each plant to fully develop itself. Any neglect in this particular is fatal to the production of fine flowers, a little extra trouble in thinning being amply repaid by the greater profusion and lengthened duration of the blossoms. Keep them free from weeds, run the hoe amongst them occasionally, and water if necessary at any time.

Half-Hardy and Tender Annuals. This section comprises some of the most useful and interesting plants, suitable for the summer decoration of the flower-garden, but being of a rather tender nature they require careful treatment in the first stages of their growth. For flowering in the open air, the first sowing is made in heat, in March or April, and the second in the open ground, when the risk of frost has passed. For early sowing, use shallow pans or boxes, well-drained and filled with a nice light compost of loam, leaf-mould and sand; place them in a frame where they can have the advantage of a little mild bottom-heat, and there they will germinate quickly. When large enough, prick out into a little stronger compost, either in pots or boxes, or under hand-lights, and gradually harden off, for planting out in May. If only a few are required, and not very early, they should be sown thinly on a half-spent hot-bed or in the house. If sown after the middle of May they may be planted in the open ground like Hardy Annuals. In the case of very small seeds, such as Petunia, Lobelia, etc., the covering of soil should be very thin, bearly hiding the seeds, and as seeds so small are liable to be carried down into the soil unless very carefully watered, it is even advisable to moisten the surface of the soil before sowing instead of afterward. Toward the end of May, when the danger from night frosts is past, the plants can be transplanted to their permanent positions in the open bed or border. Tender Annuals should be sown in the same way as the Half-Hardy ones, at any time from the month of February, according to the peculiarities of each. The plants should be potted off singly into rich compost, and kept as close to the glass as possible. Repot when necessary, and grow on in heat rapidly until the plants are well advanced. Keep them well supplied with water, and a uniform temperature must be maintained, so that they may not receive any check whilst growing. They should then be gradually hardened off, so as to be ready for placing in the conservatory as they come into flower. Many of the varieties may be planted in the flower-garden about the middle of June, where their neat and attractive appearance will add considerable interest to the summer display.

Hardy and Half-Hardy Biennials and Perennials. Under the heading of Biennials and Perennials are included many of our finest flowering plants, which are often neglected because they do not bloom the first year from seed. This long waiting for bloom may in many cases be avoided by treating the seeds as recommended for Half-Hardy Annuals, and starting them sufficiently early to form large, strong plants by the time they should be planted in their permanent quarters. The hardier species and varieties of Biennials and Perennials may be sown at the same time as Annuals, if desired, always choosing showery weather and a shady situation for the operation; but if they are wanted for flowering the following spring, sow in May or June, and again at the end of August or beginning of September. The plants raised from this later sowing should stand in the seed-bed all winter, and be transplanted the following spring. Those raised in May or June should be pricked out thinly on a nice piece of ground, and encouraged to make a good growth before they are lifted and planted out in October. Many of the species improve by age, forming large clumps or bushes, and, by being divided occasionally, the stock is increased and the plants invigorated. Half-hardy and Tender subjects should be treated, in a general way, as if they were Annuals, with regard to their propagation and subsequent culture.

Seeds of Green=House Plants. These can be sown at any season of the year, but extra care should be given them, especially to such varieties as Begonias, Calceolarias, Cinerarias, etc., as the seeds are very small and delicate. Sow the seed in well drained pans, choosing for soil a fine sandy leaf-mold; press it firmly, smooth the surface and sow the seed very evenly; cover with a light sprinkling of sand or not at all, lay a pane of glass over the pan, place it in a close frame and keep shaded. Most failures are due to mistakes in watering, which should be done very carefully; the seed pans should never be allowed to dry out, as one neglect will kill the seeds just starting, while on the other hand a slight excess of water will cause the seeds to rot. After the plants are up, remove the glass and prick into other pans with the same soil; great care should be taken not to pull the plants or tear the roots in transplanting; lift with a trowel or stick and shift with good roots. Keep them shaded after transplanting until the young plants are well established in the new soil. As soon as the plants touch each other, transplant again into small pots with similar soil, using the same precaution of shading at first. if troubled with green flies, fumigate occasionally with tobacco.

ABRONIA.—Pretty trailing plants, producing clusters of sweet-scented, verbena-like flowers, especially fragrant toward evening, lasting in bloom a long time; effective in beds, rock-work or hanging baskets. Peel off the husk before sowing the seed. Half-hardy annual.

1 Umbellata. Rosy lilac, white eye; 1/2 foot......5c pkt-

ABUTILON.—(Chinese Bell Flower.)—Greenhouse shrubs of easy cultivation, with beautiful drooping bell-shaped flowers of various colors; sown any time before April, in a temperature of sixty degrees, they will produce fine flowering plants the first season; can be planted outside during the summer. Half-hardy perennial.

Abutilon.

- ACACIA.—Elegant half-hardy shrubs, having fine ornamental foliage, and beautiful racemes of various shades of yellow globular flowers. Soak the seed in warm water before sowing.
- ACHILLEA.-CHILLEA.—A very free-blooming, hardy perennial plant, of branching habit. Useful for cut-flowers or for planting in cemeteries. Easily grown from seed, flowering the first season if sown early.
- ACROCLINIUM.—A beautiful class of everlasting flowers.
- 4 The Pearl. Pure white double flowers; 1½ feet.....
- ADONIS. ONIS.—(Flos Adonis.) Showy hardy annual of easy culture, with pretty fine-cut foliage, and lasting a long time in bloom.
- ADLUMIA.—(Mountain Fringe, or Allegheny Vine.) A graceful hardy biennial climber; the feathery foliage closely resembles that of the Maidenhair Fern; the flowers are tube-shaped, and completely cover the plant. For covering trellises, stumps of trees, etc., it is very desirable.
- AGROSTEMMA.—(Rose of Heaven.) An attractive free-flowering hardy perennial of easy culture, producing flowers on long slender stems like a single pink. Blooms the first season. Fine for cutting; 1 to 2 feet.

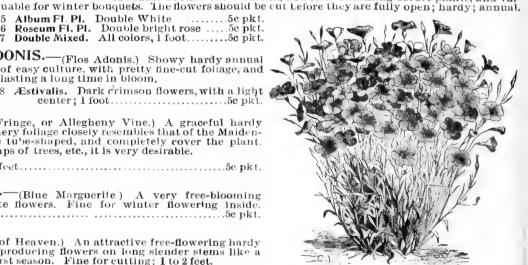

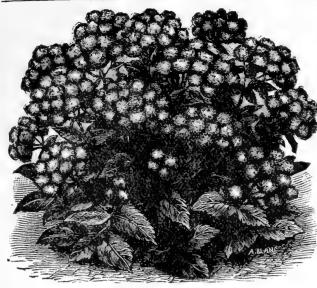

Abronia.

Charming border plants, and val-

\$4.00

Agrostemma.

Ageratum-Blue Perfection.

AGERATUM.-**IERATUM.**— Valuable plants for large beds or borders, and very useful where cut-flowers are in demand; in bloom the whole summer. Easily raised from seed, which should be sown in March, or earlier, in a hot-bed or window, and transferred to the open ground in June; also good for winter blooming, of easy culture, succeeding in any soil. Half hardy annuals.

PER PKT.

Blue Perfection. Dwarf compact growth, large dark-blue flowers; valuable for borders and bedding. 10e

Grandiflorum Album. Large pure white, fragrant; a great improvement on the old white sorts 10e

Lasseauxii. Fine rose, long bloomer, 1½ ft. 5e

42 Stuarti. Large erect blue flowers, pure white corolla 10c
43 Double, Mixed. Choice colors
ARISTOLOCHIA.—(Dutchman's Pipe). A hardy perennial climb-
er, of rapid, luxuriant growth, with large, heart-shaped leaves.
er, of rapid, idxurrant growth, with rarge, neart-shaped leaves. PER PKT.
45 Sipho. Brown-colored flowers, resembling in shape a pipe 5c
46 ASPARAGUS PLUMOSUS NANUS.—This grace-
Illis grace-

ful climbing Asparagus has fine foliage, and will last for weeks after being cut. It is an excellent house plant 10c

ASPARAGUS SPRENGERI.—(Emerald Feather). One of the best plants to grow in suspended baskets, for green-house or for outdoors in the summer. The fronds frequently grow 4 feet long, and are now considered indispensable in all fine decorations; grows readily from seed...

ASPERULA.—A profuse-flowering plant, with deliciously sweet-scented bright azure-blue flowers, and elegant foliage. Hardy annual. 48 Azurea Setosa. Blue; free bloomer. 5c pkt.
49 Odorata (Woodroof). Very fragrant 5c pkt.

Aquilegia.

The Aster is one of the most popular and effective of our garden favorites. For beauty and variety of habit, form and color, it stands unrivaled. No family of plants bears such distinct marks of progress in the last few years, in improved strains and new varieties. Give the aster a deep, rich soil, and a mulching of coarse manure is very beneficial. A little liquid manure occasionally will give good results. Sow early in the house, and transplant into pots or boxes. As soon as the weather is warm enough, plantin beds about twelve inches apart. Half-hardy annuals.

McCullough's Premier, Mixed. This mixture is composed of the finest large flowering double varieties, which, for size of flower, excellence of color and habit cannot be surpassed Grown by specialists in Europe and America, each variety imported separately and mixed by ourselves; the finest ever offered.......oz. \$5.00, ½ oz.; 70c, 10c pkt.

Magnificent flowers of the richest colors; thrive best in an equal mixture of peat, loam and sand. Sow in March, on the surface, a warm, moist atmosphere When the second leaf appears, transplant into shallow pots to grow through the summer. Allow them to rest through autumn, and keep in same pots through winter, giving little water. In spring repot and water freely; will blossom second season. Stove perennial bulbs. GLOXINIA.-

Stove perennial bulbs.

GOMPHRENA (Globe Amaranth).—A desirable everlasting valuable for its handsome globular heads of flowers. Seed germinate very slowly. If the cotton coating which surrounds it is removed, the seed will be more certain to grow. Half-hardy annual.

290 Fine Mixed...... 5c pkt.

Gloxinia.

Gomphrena.

FLOWER SEED BY WEIGHT.

We carry a large stock of flower seeds and can furnish any quantity desired of any sort. Send us your list for estimate.

GODETIA.—An attractive hardy annual, deserving more extensive cultivation. The plants bloom profusely and bear showy flowers of rich and varied colors; 1½ feet.

PER PKT. Duchess of Albany. Beautiful, large flowers, of rich sating-

white
Lady Albemarle. Carmine-crimson. Compact habit. Very beautiful

GRASSES, ORNAMENTAL.—When carefully dried, they are useful in making up winter bouquets. Cut when in full bloom, and before the flowers get too old; tie in small bunches and hang up in a dry, dark place, with the heads downward.

PER PKT.

hard, shining, pearly seeds, resembling tears; 2 feet
297 Erianthus Ravennæ. A hardy perennial, noble grass, with exquisite white plumes. Flowers the first season if sown very early; 10 feet....

293 Eulalia Jponica. One of the most beautiful of the tall-growing grasses; 5 feet; hardy..... Gynerium Argentum (Pampas Grass). The finest ornamental grass in cultivation. Haif-haidy perennial; 10 feet.................. 5c

300 Pennisetum Ruppelianum. Beautiful and graceful spikes of purple; whether for border decoration or for bouquets this is one of the best; $2\frac{1}{2}$ feet

Stipa Pennata (Feather Grass). A hardy perennial; flowers the second season from5c

Finest Mixed. Used for making winter bouquets 5c

DURDS.—A tribe of climbers with curiously-shaped fruit, in various colors. Being of rapid growth, they are fine to cover old fences, trellises, stumps, etc. The foliage is quite ornamental, and the marking of some of the fruit quite extraordinary. Do not plant the seed till all danger of frost is over, and select rich, mellow ground. Tender annual climbers, 10 to 20 feet high.

312 GREVILLEA ROBUSTA (Silk Oak).—A very beautiful and graceful decorative plant with fern-like foliage; excellent for table decoration; easily raised from seed, producing good-sized plants in a short time

GYPSOPHILIA (Bridal Veil or Baby's Breath).—Free-flowering little plants, completely covered with starry white flowers; succeeding in any soil; well suited for hanging baskets and edgings. Hardy perennial.

HELIANTHUS (Sun Flower).—Remarkable for the stately growth, size and brilliancy of their flowers. It is also raised as an absorbent of miasma in damp or ill-drained situations, thus preventing fevers. The seed is good for feeding poultry. Hardy annuals.

plant for the lawn, shrubberies or any other place where color effect is desired. The plants grow 6 to 7 feet high and produce a great number of double flowers of various sizes. On account of their size, long stems and color the flowers are extremely well adapted for oz. 25c, 5c pkt. vases ...

Cucumerifolius Stella (Miniature). — Large single, golden yellow, with dark center; handsomely formed; freely produced on long stems; excellent for cuttingoz. 25c, 5c pkt.

Globosus Fistulosus (Dahlia Sunflower).-Flowers large, double, of a rich saffron 317

Helianthus Cucumerifolius.

319

Helianthus.

HEDYSARUM (French Honeysuckle).—A free-growing, showy border plant, of easy culture. Bears attractive pea-shaped flowers. Hardy biennial. 324 Red and White Mixed
HELICHRYSUM.—Everlasting flowers, large and full. Colors, white, yellow, and red- Cut just before the flowers fully expand. Hardy annual. 325 Double. White, red, and yellow, mixed
HELIOTROPE. —A half-hardy perennial, flowering during the whole season; its delightful perfume makes it a most desirable bouquet flower; a splendid bedding plant, or can be trained as a greenhouse climber. Seed sown in the spring will make fine plants for summer blooming. PER PKT.
326 Lemoine's Giant. Of robust growth and producing heads of flowers double the size of the old sort
327 Snowball. Beautiful white, large flowers

Heliotrope.

329 HELIPTERUM SANFORDI.—A very pretty border annual of dwarf habit, bearing large globular clusters of bright golden-yellow everlasting flowers. 1 foot5c pkt.

- HIBISCUS (Marsh Mallows).—Showy, ornamental plants, for mixed beds or shrubbery border, having large-sized, varied and beautiful-colored flowers.

 - Crimson Eye. Flowers of the largest size, pure white, with a large spot of velvety crimson in the center of each flower. Hardy perennial; flowers the first year from seed sown early
 - Giant Golden Bowl. A shrubby perennial, cup-shaped flowers from 6 to 9 inches in diameter. The color is a rich deep cream with a velvety maroon center. The plants commence to bloom early and continuously until cut down by frost. The seed should be started indoors and set out as soon as the weather is warm
- HONESTY (Satin Flower).—Early free-flowering plants. Admired for their silver-like seed pods. Hardy biennial.
 - 334 Lunaria Biennis

455 Liliput or Miniature. This is a dwarf compact form of the well-known Tropaeolum Lobbianum. It forms small dense bushes which are fairly hidden by flowers, the colors of which are very varied 20c oz., 5c pkt.

Pansy Bugnot's Exhibition.

PANSY.—This attractive plant is too well-known to require any description, as it is a favorite with all; the seed can be sown from September to March. The best plants are obtained from seed sown in the autumn, and protected during the winter; these flower early in the spring. The plants from spring sowing should be planted in a shady border; they produce fine large flowers in the autumn. Pansies require fresh soil, enriched with decomposed manure. Our seeds are from the most noted European growers. The choice strains being unsurpassed for size and form of flower, beauty of markings, brilliancy and variety of colors and shades. Hardy perennial. Six inches.

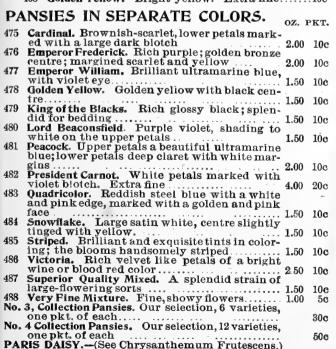

Masterpiece. The enormous large flowers are borne well above the foliage on strong stems. The petals of the flowers are waved or curled. The flowers are perfectly round and contains the richest combination of colors, that have ever been offered in a five spotted Pansy. Each petal is distinctly marked with a very large dark blotch and most of the flowers are margined with a light, white or yellow edge. 25c

459 Pretiosa Giant. A distinct variety of the Giant Five Spotted Pansies. Each petal is marked with a very large blotch of deep violet color, these blotches are surrounded by a brilliant crimson rose ground color, and the ground color is margined with a pure white edge. A very effective and bright variety. 25c

IIANT TRIMARDEAU VARIETIES.—A desirable and very attractive strain. The plants are of compact, robust and free-flowering habit. The flowers of immense size, measuring four inches in diameter; of good substance and unsurpassable in beauty and variety of coloring.

Satiny white, centre slightly tinged with yellow 10c Emperor William. Ultramarine blue, with distinct dark blue eye 10c 468 Golden Yellow. Bright yellow. Extra fine. 10c

Improved Trimardeau Giant.

PHLOX DRUMMONDII.

The annual Phloxes are dazzling in effect particularly so when sown in masses or ribbon beds of contrasting colors. Few flowers are so easy to grow from seed, so pretty and compact in habit, so quick to bloom, or give such a brilliant display of color for so little cost and care. For pot culture and as an undergrowth for tall, bare-stemmed plants they are also valuable. The first sowing should be made as soon as the frost is out of the ground in spring; later ones in May, either where the plants are to bloom, or in a seed bed, as the Phlox transplants readily. In transplanting set the taller kinds about a foot apart. Cutting away the flowers makes the plants more bushy and compact, and lengthens their blooming time. Average height 1 ft.

DRUMMONDII GRANDIFLORA.—Large-flowering varieties.
ment on the old varieties in more compact growth and larger flowers.

Phlox Drummondii Nana.

507 Phiox Perennial Hybrids Phlox Perennial Hybrids (Phlox Decussata.) Tall growing, perfectly hardy class, with immense trusses of large and beautiful flowers, in the greatest variety of colors. 3 ft. 10c

Por out-door decoration or house culture few plants are equal to this class. They commence flowering early, and continue a mass of bloom throughout the whole season, until killed by frost; easily cultivated, requiring a rich soil and a sunny situation. Of late years the single-striped, mottled, and double varieties have been greatly improved. The seeds of the double Petunia do not possess as much vitality as those of the single, and a good deal of care must be used to get them to germinate; nor will they all come double. There are two distinct kinds of single Petunias—the Grandiflora sorts, with large flowers, and the small flowered section, which gives abundance of bloom.

508 McCullough's Mammoth. This mixture is made by ourselves, and includes, besides the California Giants, all the colors of the large flowering and fringed sorts, and the unsurpassed Superbissima varieties, with their delicately veined throats in various colors, and their truly mammoth flowers.

Giants of California. Flowers very large, in great variety of colors and markings, with broad, deep yellow throats, veined

POPPIES. — Very showy, free-blooming and easily cultivated plants, with large brilliant-colored flowers, growing freely in any garden soil, and producing a fine effect in large clumps or mixed beds. A great advance has been made in recent years in the development of the Poppy, which has brought it into deserved popularity, and it may be safely said that no other flower produces a more brilliant display of color during the blooming period. Sow early in the spring where they are to remain, as they will not bear transplanting.

SWEET PEAS.

Flowering Peas are among the most useful and beautiful of all our hardy annuals Nothing can be better for large bouquets, as the flowers are lively and delicate, varying in color from darkest purple imaginable, and including the brightest pinks; as fragrant

THE NEW METHOD OF CULTIVATING SWEET PEAS.

The New Method of cultivating sweet peas.

The principal essential for the best success is a cool, deep, moist soil, and a sunny situation. The ground should be prepared deep and rich. Fall preparation, where possible, is preferable, but if done in the spring, use no green manure. Bone meal is good if old rotted manure cannot be obtained. Sow early, even before the frost is out of the ground, as Sweet Peas need the cool, moist spring ground to make the root growth. In the latitude of Cincinnati, February is not too early. In the South, sow in the fall. Sow the seed in deep furrows, the bottom of which must be at least six inches below the level of the soil; this is to guard against a summer drought. Cover the seeds only one inch, after which the furrow is still five inches deep. When the plants are two or three inches high, fill in another-inch or so of soil around the plants, always leaving a portion of the plant above the surface; do this at intervals, until the furrow is nearly full; it should always remain a little hollow, to hold the rains, and to allow water to be applied by the bucketful in dry weather.

Mulching with old leaves, straw or hay assists in the retention of even moisture and temperature for the roots; any fresh manure or other heating material must not be used. Under such congenial conditions Sweet Peas luxuriate and bloom in continuous abundance from early summer until cut down by frost, provided the flowers are freely picked each day, and no pods are allowed to develop.

Our Sweet Peas are unsurpassed, having been selected from the

develop.

Our Sweet Peas are unsurpassed, having been selected from the finest strains. They include all the improved large-flowering varies

ties of recent introduction.

Double Dahlias.

Gladiolus-Snow White.

GLADIOLUS.

The most attractive of all summer flowering bulbs are the Gladioli. Wonderful improvements have been made in recent years in the size and beauty of these flowers, and our list comprises only the best selections, both in our mixtures and named sorts. Their cultivation is very simple, as they will thrive in any ordinary garden soil, but amply repay care and liberal feeding by enhanced size and beauty. A succession of bloom may be had from July to September by planting at intervals from April to June. The strongest bulbs should be kept for the latest planting. Plant six inches apart in beds or double rows, and three inches deep. They are very effective when planted among roses, shrubbery, etc. In the fall, before frost, the bulbs should be lifted, dried and stored in a cellar or some other position away from frost, for planting again the following spring. again the following spring.

again the following spring.

Augusta. Lovely pure white, with blue anthers.
Ben Hur. Salmon rose, tinged flaked and mottled with blue; throat beautifully mottled and spotted.

Bowdoin. Orange scarlet, with large pure white throat.

Dr. Sellew. Rosy crimson. slightly pencilled darker; center of petals and throat rayed white.

Eugene Scribe. Rose, blazed carmine-red; flowers very large. Isaac Buchanan. Pure yellow; a beautiful flower. Lafayette. Yellowish salmon, crimson blotches; very large. Marginata. Salmon, with crimson and white throat; each petal having a delicate margin of slate blue.

May. White, flaked bright crimson, superb spike.

Mrs Beecher. Rosy crimson, pure white throat, freely marked

Lilium Auratum.

LILIES.

No class of plants can lay so much claim to our attention as the Lilies. They are stately, elegant and beautiful and possess the most agreeable perfume, and for general effect, whether growing in garden or house, they have no rivals. The soil should be rich, deep and mellow, with good drainage, as nothing will injure the buibs more than water collecting and standing around them. Do not put manure about the bulbs when setting as it collects moisture and insects, and often causes the bulbs to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and straw manure to exclude the frost. Set bulbs four to six inches deep according to their size.

with leaves and straw manure to exclude the frost. Set bulbs four to six inches deep according to their size.

Auratum. (Golden Japan Lily.) This superb Lily has flowers 10 to 12 inches in diameter, composed of six white petals, thickly studded with rich chocolate-crimson spots and a bright golden band through the center of each petal; exquisite vanilla-like perfume. Extra strong bulbs 25e each, \$2.50 dozen. Large bulbs 15e each, \$1.50 dozen.

Longiflorum. A variety bearing in clusters beautiful snow-

ters of beautiful single flowers, which emit a delightful odor. They bloom nearly the whole summer, and are covered during autumn and winter with red seed pods.

Rugosa. Fine glossy crimson. | Rugosa Alba. Pure white. Strong Plants, 30c each; \$3.00 per Dozen.

Extra Strong Plants, \$1.00 each; \$10.00 per Dozen.

PERSIAN YELLOW. Perfectly hardy; flowers double and full; deep golden yellow in color; blooms very freely in June. The finest hardy yellow rose grown.

Strong Plants, 25c and 50c each; \$2.50 and \$5 00 per dozen.

HARDY CLIMBING ROSES.

HARDY CLIMBING ROSES.

Baltimore Belle. Pale blush; nearly white.

Gem of the Prairie. Large and double; color light crimson, somewhat blotched white.

Prairie Queen. Deep rose; hardy and desirable.

Michigan Climber. Single variety; flowers nearly two inches in diameter; produced very freely; color bright rich pink; strong vigorous grower.

Sweet Briar. Highly prized on account of the delightful fragrance of its leaves and young branches. The flowers are single, bright pink; very desirable for hedges and general garden planting.

Dorothy Perkins. A shell-pink climbing-rose. This rose is of the same strong habit of growth as Crimson Rambler, and the flowers are borne in clusters of thirty to forty. The flowers are large for a rose of this class, very double, The flowers are large for a rose of this class, very double, sweetly scented and of a beautiful shell-pink. A great acquisition; good forcer and free flowerer; absolutely hardy

Crimson Rambler. The plant is of very vigorous growth, mson Rambler. The plant is of very vigorous growth, making shoots from eight to ten feet during the season. The flowers are produced in trusses, pyramidal in shape, good specimens measuring nine inches from base to tip, and seven inches across, fairly covering the plant from the ground to the top, so that it is one mass of glowing crimson. The color is superb, and remains strong and vivid to the end. The profusion of bloom is marvelous, over three hundred blossoms having been counted on one shoot.

Crimson Rambler.

Rambler. Pure satiny rose. The partially open buds being bright, light carmine, thus producing a strong and pleasing contrast. In hardiness, freedom of bloom and vigorous climbing habit fully equal to Crimson Rambler. ite Rambler. Closely resembles the Crimson Rambler in vine and foliage. Large clusters of pure white flowers, which are deliciously fragrant. The flowers remain on the plant a long time (from three to five weeks), and keep a long time Pink Rambler.

when cut. Yeliow Rambler. The flowers are borne in immense clusters, often as many as 150 blossoms in a bunch. The color is a decided yeliow; the flowers are very fragrant; the habit of growth is very vigorous. Well established plants often making shoots eight to ten feet in one season.

Large Plants, 30c each; \$3.00 per Dozen. We have some Extra Strong Plants at 50c and \$1.00 each.

Large Rose Plants can only be sent by Express, at purchaser's expense.

TEA ROSES.

Tea or Ever-blooming Roses are quite hardy south of the Ohio River and with careful protection live through our severe northern

River and with careful protection live through our severe northern winters.

American Beauty. Deep rose shaded towards centre a rich carmine crimson; delicious fragrance.

Strong plants, 35c each; \$3.50 Dozen.

Medium plants, 25c each; \$2.75 Dozen.

Bridesmaid. Deep brilliant pink. The buds are large, long and pointed. A most desirable sort for garden or winter forcing.

Burbank. The freest flowering Rose in cultivation; commences to bloom when only a few inches high and blooms throughout the season until killed by frost. Color, bright pink; strong vigorous grower, perfectly hardy and fragrant.

Ctothilde Soupert. Pearl white, shaded at the centre with silvery rose; produced in the greatest profusion. It makes a fine plant either for pot culture or outdoor planting.

Dr. Grill. Color, copper yellow. The best and freest flowering yellow Rose; perfectly hardy.

Duchess of Albany. Rich deep plnk, exceedingly fragrant; vigorous grower.

Etoile de Lyon. Deep golden yellow; very large and full buds, strong, vigorous grower; fine for outdoor summer-blooming.

Golden Gate. Creamy white, delicately tinged with rose; flowers are large, very double and full, and delightfully fragrant, Gruss-an-Teplitz. Color, bright scarlet, shading to crimson; fragrant and profuse bloomer. The foliage is beautiful, all the young growth being a bronzy plum color. A queen among scarlet bedders. A perfect mass of crimson scarlet all summer.

Hermosa. Probably the most popular bedding rose in cultivation. It is a bright pink color, free flowering and perfectly hardy.

Kalserin Augusta Victoria. Pearly white, lightly tinted with lemon in the centre, remarkably fragrant, a strong healthy grower with bold, beautiful foliage. Flowers are borne on long stems.

La France. Splendid satiny rose; very large, full, fine form, a constant bloomer, delicious fragrance.

Madame Abel Chatenay. Flowers are and full, petals recurved, and of a beautiful rose, shaded with rose vermillion and tinged with salmon.

with salmon.

Maman Cochet. Deep rose pink. A strong, healthy growing variety, with rich, bright foliage. A grand bedding Rose, as it is a profuse and continuous bloomer.

Maman Cochet White. The flowers are of enormous size, remarkably round and full, pure, clear, snowy white, sometimes tinged with rose; delightfully tea scented. It is by far the finest and most reliable white bedding Rose yet produced.

Marechal Neil. Golden yellow, climbing habit.

Meteor. Rich dark velvety crimson; a free blooming and vigorous grower.

Perle des Jardins. Beautiful rich yellow, of large size and perfect form.

President Carnot. The flower of the largest size, of exquisite shape; buds long and pointed; color outer petals, white centre delicate flesh pink. Excellent summer blooming variety.

The Bride. Pure white, large size and perfect form, strong grower and free bloomer; delicious fragrance.

Large Plants, 25 Cents Each; \$2.75 per Dozen.

EXCEPT WHERE NOTED.

HEDGE PLANTS.

California Privet. (Ligustrum Ovalifolium). Of all ornamental hedge plants this is the most popular, and more of it is planted than all others combined. Its foliage is a rich dark green, and is nearly evergreen, remaining on the plant until mid-winter. It is of free growth, and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. The most advantageous manner of planting is in double rows, the two rows being about 8 inches apart. The plants is unlid be set 12 to 15 inches apart in the row-atternating the plants. In order to secure a dense hedge from the base up, the plants should be severely pruned the first two seasons. Large Plants 75c dozen; \$4.00 per 100. Extra Large Plants \$1.00 doz. \$6.00 per 100. Osage Orange. The sissi flused extensively on farms and along highways. It makes a strong defensive hedge that will turn cartle, should be planted in dour te rows. 6 to 9 inches apart in a row. Strong 2-year old plants 50c per

inches apart in a row. Strong 2-year old plants 50c per 100: \$4.00 per 1000.

Pyrus Japonicus. The Japan Quince or Fire Bush is one of the oldest ornamental hedge plants and still used extensively. 18 to 24 inches high, \$15.00 per 100.

Fruit Trees, Small Fruits, Grape Vines, Etc.

ELECT thrifty young trees in preference to old or very large ones; the roots are more tender and fibrous, and they bear trans-9 planting better and are more apt to live; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth. If not prepared to plant when your stock arrives, "heel in" by digging a trench deep enough to admit all the roots and setting the trees therein, carefully pack the earth about the roots, taking up when required. Never leave the roots exposed to the sun and air.

SENT BY EXPRESS OR FREIGHT AT EXPENSE OF PURCHASER.

APPLES.

We can furnish all varieties usually catalogued, but the following list comprises the most desirable sort: Three years old, 6 to 7 feet high, 25c each, \$2.50 per dozen.

SUMMMER VARIETIES.

Early Harvest. Pale yellow, fine flavor; August. Golden Sweet. Pale yellow, sweet and good; August. Keswick Codlin. Large pale yellow, pleasant; August. Sweet Bough. Large pale yellow, tender, sweet. Yellow Transparent. Pale yellow, good quality.

AUTUMN VARIETIES.

Fall Pippin. Very large, yellow, rich, aromatic.

Maiden's Blush. Large, beautiful, blush cheek.

Rambo. Yellow, streaked with red; October to December. Red Beitigheimer. Pale cream, covered with crimson.

WINTER VARIETIES

Baldwin. Large, dark red, productive.

Ben Davis. Large, handsome, striped; good quality.
Golden Russet. Medium, dull russet, crisp, juicy.
Northern Spy. Large, striped red; good keeper.
Rawle's Janet. Medium, yellow, striped with red, rich, crisp and juicy; a long keeper.
Rome Beauty. Large, yellow, shaded red, tender.
Smith's Cider. Medium; tender and juicy; sub-acid.
White Pippin. Large, pale yellow, rich sub-acid.
Wine Sap. Medium, deep red, rich sub-acid.
York Imperial. Medium, yellow, shaded red, firm, juicy sub-acid. An excellent shipping apple.

CRAB APPLES.

STANDARD.

5 to 7 feet, 25c each; \$2.50 per dozen.

Deep crimson, very popular on account of its large Hyslop. size, beauty and hardiness. Transcendant. Skin yellow, striped with red.
Whitney. Large, glossy green, splashed carmine, firm, juicy, great bearer, excellent for cider.

PEARS.

STANDARD AND DWARF.

6 to 7 feet, first-class, 50c each; \$5.00 per dozen.

Bartlett. Large, clear yellow, juicy. August.
Clapp's Favorite. Large, juicy and rich. August to September. Flemish Beauty. Large, juicy, rich and fine. September to

October October.

Kieffer's Hybrid. Large, rich color and good quality.

Lawson. Yellow, flushed with crimson, crisp and juicy.

Lawrence. Yellow, thickly dotted, fine flavor.

Seckel. Small, yellowish brown, one of the best.

Tyson. Large, yellow with brown cheek, sweet.

Wilder. Yellow with red cheek, fine quality.

PEACHES.

4 to 6 feet, 25c each; \$2 50 per dozen.

Alexander. Medium, greenish white, juicy, sweet.

Champion. Creamy white with red cheeks, freestone, excellent quality. Early in August.

Crawford's Early. Large, yellow, of good quality, freestone. Early in September.

Crawford's Late. Large, yellow with red cheek, freestone. Last of September.

Crawford's Late. Large, yellow with red cheek, freestone.
Last of September.
Elberta. Large, yellow with red cheek, flesh yellow, firm,
juicy, of high quality, very prolific.
Fitzgerald. Large, yellow, suffused with red, flesh deep yellow, best quality, hardy and productive.
Mountain Rose. Large, handsome red cheek, flesh white,
juicy, one of the best. August.
Old Mixon Free. Large, yellow with red cheek.
Sneed. The earliest variety; medium size, creamy white with
light blush cheek. excellent quality.

light blush cheek, excellent quality.

CHERRIES.

(HEART AND BIGARREAU.)

5 to 7 feet, first-class, 50c each; \$5.00 per dozen.

Black Tartarian. Very large, black, juicy rich, excellent, productive. Last of June.

Governor Wood. Large, light red, juicy, rich, delicious. Tree healthy and productive. June.

Napoleon. Large, pale yellow, firm, juicy, productive.

Rockport Bigarreau. Large, yellow, juicy and sweet.

Windsor. Large, liver colored, fine quality.

CHERRIES. (DUKE AND MORELLO.)

4 to 6 feet, first-class, 50c each; \$5.00 per dozen. Early Richmond. Medium, dark red, fine quality.
Empress Eugenie. Large, dark red, fine quality.
English Morello. Dark red, rich, acid, juicy and good.
May Duke. Large, red, an excellent variety.
Reine Hortense. Large, red, juicy and delicious.

PLUMS.

STANDARD.
On Plum Stocks, 5 to 7 feet, 50c each; \$5.00 per dozen.

Abundance. Large, yellow, with heavy bloom, good quality, very prolific.

Bradshaw. Large, dark red, flesh green, productive.
Genii. Large, purple, sweet, good market variety.
Lombard. Medium red, juicy, good, hardy and productive the leading market variety.
Shipper's Pride. Large, purple, fine, juicy and sweet.

On Peach Stocks, 4 to 6 feet, 50c each, \$5.00 per dozen. Damson. Small, oval fruit, purple, hardy, productive. Weaver. Large, purple, very prolific. Wild Goose. Medium, purple.

BLACKBERRIES.

50c per dozen; \$3.00 per hundred except where noted. Should be planted in rows six to seven feet apart, three to

Should be planted in rows six to seven feet apart, three to five feet in the rows. Keep the ground light and rich. Pinch the canes back when they have reached four feet in height.

Ancient Briton. Large fruit, stems loaded with good-sized berries of fine quality, vigorous grower, hardy.

Early Harvest. Very prolitic, choice variety.

Eldorado. Large fruit, borne in large clusters and ripen well together, fine quality, good keeper.

Snyder. Medium size, sweet and juicy, extremely hardy and very productive.

White Iceland. A white blackberry. This is a decided novelty, very prolific, sweet, tender and firm. Price, 10c each; \$1.00 per dozen.

CURRANTS.

10c each; \$1.00 per dozen.

Set four feet apart in rich ground. Cultivate well or mulch heavily; prune out old wood so that each remaining shoot will have room to grow. Manure freely. Two-year-old plants.

Black Champion. Large bunch and berry, excellent quality, strong grower, very productive.

Cherry. Fruit large, bunch small, deep red, acid.

Fay's Prolific. Extra large stems and berries, color rich red, fine quality, very productive.

Pomona. Bright red, extra fine quality and enormously productive; strong vigorous grower.

White Grape. Large, yellowish white, sweet, excellent quality and valuable for the table.

DEWBERRY.

Lucretia. One of the low-growing, trailing blackberries. earliness, size and quality, it equals any of the tall growing sorts. It has proved highly satisfactory wherever tried, and many say it is the best of all the blackberry family.

50c per dozen; \$3.00 per 100.

GOOSEBERRIES.

Industry. English sort, of very large size, hardy \$2.50 doz.

Fruit Trees, Small Fruits, Etc.—Continued.

VINES. GRAPE

Ives' Seedling. Dark purple, sweet, hardy.
10c each; \$1.00 doz.

Martha (White Concord). Large, pale yellow; strongly resembles the Concord in all points except color.

15c each : \$1.50 doz.

Moore's Early. Ripens ten days earlier than Concord; bunch and berry round and large; black, with a heavy blue bloom.

15c each; \$1.50 doz.

RASPBERRIES.

40c per dozen; \$2.00 per hundred.

The Raspberry should be planted in good, rich soil, in rows five feet apart and three feet apart in the rows. As soon as they have done bearing cut out the old wood to give more vigor to

nave done bearing cut out the old wood to give more vigor to the young canes.

Brandywine. Large size, light crimson color, good quality and firm; vigorous and productive. One of the best, well-tested, large early berries for the North.

Cuthbert. Large, firm, deep rich crimson, of excellent quality, tall, strong and vigorous, perfectly hardy and very productive. Ripens medium to late.

Eureka. Large, black variety, fruit firm, of superior quality, strong, vigorous grower and very prolific.
 Golden Queen. Berries large, golden yellow, bright and firm, and of fine, rich flavor; vigorous, productive and healthy.
 Gregg. A large black variety, fruit firm, of excellent quality and a good shipper.
 Loudon. The best red, mid-season berry; fruit large, of a boutful property.

beautiful rich, dark crimson color, good quality and marvel-ous productiveness and hardiness. Will remain on bushes the longest without injury.

STRAWBERRIES.

NY ORDINARY soil will grow strawberries, though the richer it is made the larger the fruit. For garden culture, the most convenient method is to plant in beds four feet wide, three rows in each bed, and plants one foot apart in the row. A pathway two feet wide should be left between the beds, so that the fruit may be easily picked and the bed kept clean without stepping on them. Cover lightly in winter with corn stalks or some coarse litter; rake off in the spring, dress the beds, and mulch with litter or short grass from the lawn. All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens, and are termed pistillate or imperfect-flowering varieties, and must be planted near some perfect-flowering sort, or they will produce little or no fruit. We advise Fall planting for best results.

25c per Dozen: \$1.00 per Hundred: \$7.50 per Thousand

Brandywine. Large, roundish conical; bright, glossy crim-

Brandywine. Large, roundish conical; bright, glossy crimson; berries, firm and solid, excellent quality and fine flavor.
Bubach No. 5 (P). Very large and productive, bright scarlet; a fine market variety; early to medium.
Enhance. Large, bright crimson, firm, very prolific.
Gandy. Large, bright crimson, berries of uniform size; plants vigorous and healthy. The best late variety.
Greenville (P). Large, roundish berries of excellent quality; firm and good shipper; very productive.
Haverland (P). Large, bright red, excellent flavor; vigorous grower: ripens fruit evenly and early.

grower; ripens fruit evenly and early.

Jessie. Large, handsome berry, of good quality; vigorous

grower; good market sort.

Marshall. Large, rich crimson, fine flavor. Plant very strong;
with high culture produces heavy crops.

Oriole (P). Large, deep red, rich aromatic flavor, firm, and a good shipper; extra early; productive.

Parker Earle. Large, rich crimson, conical shape, excellent

shipper; strong, vigorous grower; very productive; late variety

Wm. Belt. Large, brilliant red, extra fine quality. The plant is vigorous and thrifty, and very productive.

GRASS AND CLOVER SEEDS.

This department has been our leading specialty for years, and owing to our increasing trade we have been compelled to increase our already large quarters - have purchased and fitted up new warehouses and cleaning departments at 328, 330 and 332 East Front Street. They are modern in every particular and fitted up with the latest improved cleaning machinery.

Situated on the Penn. R. R. Co. tracks, with a switch into the warehouses, thereby enabling us to load and unload cars inside our own buildings.

Our facilities for handling and recleaning seeds are the most approved in the country, and therefore we are in position to give our customers the best service, both as to quality and promptness in filling orders and at least expense.

Our alm has always been to furnish the best qualities, procured directly for us by our representatives at the most reliable sources of supply now known. Our aim has always been to furnish the best qualities, procured directly for us by our representatives at the most reliable sources of supply now known.

We are pleased to announce that considerable of this season's crop of Clover and Grass Seeds is of superior quality, and as usual we have secured ample stocks of High Grade Seeds of Unexcelled Purity and Strong Germination, which places us in position to meet reliable competition from any source.

We shall always be pleased to mail samples for comparison.

Our prices are always as low, quality considered, as any house in the trade.

All orders with cash filled at lowest market prices on day of receipt. Where no prices are given, market rates will be charged, or special prices will be quoted on application.

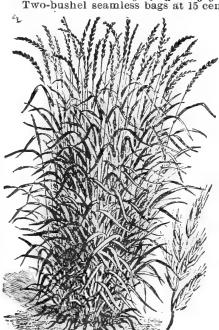

We are not only sellers of seeds, but are the largest buyers in this section, and will always pay the highest market prices. quality considered.

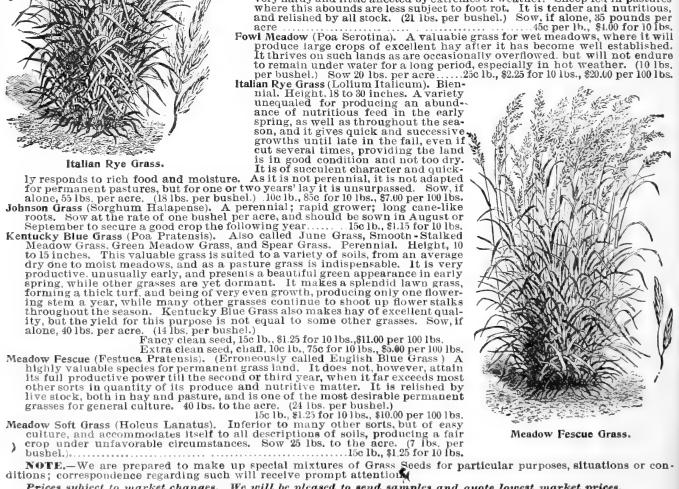

We are not only sellers of seeds, but are the largest buyers in this section, and will always pay the highest market prices, quality considered.

Owing to the varying bulk of Grass Seeds from season to season (owing to climatic conditions, which can not be controlled), they are always put up by us by weight and not by measure, thereby securing to our customers the amount they pay for, as prices are based on weight and not on bulk. The number of pounds to the bushel, in brackets, is the old way of offering grasses, and is mentioned merely for reference.

Two-bushel seamless bags at 15 cents each.

ADD 10 CENTS PER POUND EXTRA IF SENT BY MAIL.

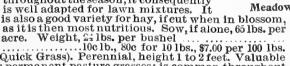

NOTE.—We are prepared to make up special mixtures of Grass Seeds for particular purposes, situations or conditions; correspondence regarding such will receive prompt attention.

Prices subject to market changes. We will be pleased to send samples and quote lowest market prices.

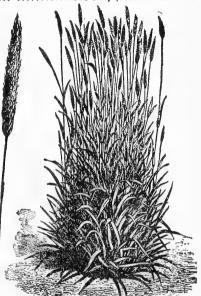

GRASS AND CLOVER SEEDS.—Continued.

feet. It blossoms about the same time as Red Clover, making it, on that account, a desirable mixture with that plant. It is exceedingly palatable to stock of all kinds, and its powers of enduring the cropping of cattle commend it as one of the very best pasture grasses Sow 35 lbs. to the acre. Weight 14 lbs. to the bushel ... 20c lb., \$1.6) for 10 lbs. Perennial, or English Rye Grass (Lolium perenne, Imported English Blue Grass). Height 15 to 24 inches. This grass is considered invaluable for permanent pastures. It produces an abundance of remarkably fine foliage, tillers out close to the ground, and

The prices quoted are subject to market fluctuations. Customers when in need of large quantities, send list of wants for lowest market price.

Meadow Fox-Tail Grass.

Tall Meadow Grass.

Orchard Grass.

MIXED GRASSES For Special Purposes.

Under this head we are prepared to furnish seeds adapted to all soils and all situations and for all purposes, composed of grasses for light soils, for medium soils and for heavy soils; by light soils we mean that which is more or less of a sandy or gravely nature; the neavy, clay and heavy loams; while the medium is an intermediate between these two. A light, wet soil, with respect to the grasses suited to it, may be considered same as to the heavy soils, and a dry, heavy soil more as the light soils.

Our best mixture is made entirely with our choice recleaned seeds, while in our second quality we use the same seeds, but without recleaning, and will belequal to the qualities usually to be had on the market. Our mixtures will all have a uniform weight of sixteen pounds to the bushel. Quantity to be used per acre, one and one-half to two bushels, and half this quantity for renovating. In ordering always state the soil and position on which you wish to use it.

Tennessee or German Golden Millet.

One-third natural size.

MILLETS.

Sow at rate of one bushel per acre.

Tennessee or German Golden Millet. True Southern Grown Seed is worth double that of Northern or Western Grown, if you want a good crop of hay or seed. We have fully demonstrated that German Millet grown in the Northern and Western States becomes deteriorated, and soon resembles Fox Tail in quality and yield. This is due to the fact that German Millet in a pating of a worm elimination.

Northern or Western Grown Millet 35c peck, \$1.15 bushel. Missouri or Common Millet.

Hungarian Grass. This grass resembles the millet, it is of fine growth, and makes an excellent hay.....50c peck, \$1.50 bushel.

Known also as Broom Corn Millet. The name Hog

CLOVER SEEDS.

Alsike, or Swedish. (Trifolium Hybridum) An excellent variety of luxuriant growth, and very sweet; valuable for pasturage or ensilage. Sow 6 to 8 lbs. per acre. 20c lb., \$1.80 for 10 lbs., \$15.00 for 100 lbs.

Alfalfa, or Lucerne. (Medicago Sativa.) One of the best varieties, succeeding in almost every situation. Will bear cutting three or four times during the season. For bringing up poor land it is the best of the clovers, as it not only produces large masses of foliage, but forces its roots down fully three feet into the earth. Sow in the spring to secure a good stand before winter. If to be used for pasturage or curing, sow 15 to 20 lbs. per acre.

20c lb., \$1.60 for 10 lbs., \$14.00 per 100 lbs.

Bokhara Clover. (Melilotus Alba.) A rapid-growing, white-flowered sort; a good bee 100d. Sow 10 to 15 lbs. per acre20c lb.

One-third natural size.

This illustration demonstrates the difference in growth between the Southern Grown Ger-man Millet Seed and that grown in Northern or Western States.

Yellow Trefoil or Hop Clover. (Medicago Lupulina). Is an excel-lent fodder plant, mixed with other Clovers or Grasses, but should not be used alone. Sow 10 to 12 1bs. per acre...20clb., \$1.40 for 10 lbs.

The prices quoted are subject to market fluctuations. Customers when in need of large quantites, send list of wants for lowest market prices.

Add Ten Cents per Pound Extra if Sent by Mail.

Farm, Field, Forage and Silo Seeds.

We give special attention to the quality of all our Farm Seeds, and send out only recleaned stock. It is our aim to send out absolutely pure stock, true to name. For green manures, we recommend sowing thickly, Scarlet Clover, Sugar Cane, Tares, Field Peas, Rye and Oats, and plowing under when six to eight inches high.

Owing to market fluctuation, impossible to quote prices. When in need, state quantity, and we will be pleased to send samples and quote lowest market prices.

Add ten cents per pound extra if sent by mail.

SOUTHERN COW PEAS.

The Great Land Renovator.

Their value as a fertilizing crop exceeds that of clover, for in addition to being a larger Nitrogen gatherer than clover, they draw from the subsoil to the surface large amounts of both Potash and Phosphoric acid, thus putting the soil in most excellent condition for following crops.

The feeding value of Cow Peas, either green fed as hay, or preserved as ensilage is very high, being considerably above that of Red Clover.

The yield of green vines per acre runs ordinarily from five to fifteen tons. The Rhode Island Experiment Station reporting one season seventeen and a half tons, equivalent to 3½ tons of dried hay.

The yield of peas vary according to varieties, condition of soil, etc., from ten to thirty bushels per acre.

Cow Peas like all other crops thrive best on good ground. The maximum result being obtained from dry sandy loam, but from their strong growth of roots will do well on almost any soil not too wet.

soil not too wet.

Sow 1½ to 1¾ bushels per acre, on land thoroughly pulverized, and disk or plow with a cultivator or double shovel plow. If wanted for hay, cut when peas are forming, cure as clover. If peas are for fertilizer, sow same quantity after same preparation as for hay, turn under when peas are in bloom. If farmers will first roll and disk peas, they will turn under much easier and be more satisfactory. For a fertilizer, especially to be followed by wheat or corn, they are simply the best. Bear in mind that the Southern Cow Pea belongs to the Bean family, therefore must not be sown until the ground is thoroughly warm and all danger from frost is past.

- **Black.** Matures quickly, best variety for the extreme northern sections of the country, gives a large yield of vines and peas. Seed large.
- Black Eye. Similar to the Black as to yield of vines and peas, generally more prolific, requires a little longer season to mature.
- Whip-poor-Will. An early variety, tall, upright, medium yield of vines, large yield of peas for which they are particularly grown. Highly recommended for "hogging down."
- Clay. The leading variety in the South. Large yield of vines and peas, but requires longer season to mature than the former named varieties. Fine for summer pasture or green feeding, or to turn under green for soiling.
- Mixed Cow Peas. These are splendidly adapted for those who merely wish same for feeding purposes, and, being mixed, we are able to offer them at a much lower price.
- Soja Bean. This valuable forage plant has attracted increasing attention yearly. It is one of the most nutritious of all vegetable products. It will produce a crop of twenty to thirty bushels peracre, and is as easily grown as other beans. For pasturing or feeding as green fodder it is very valuable, and nearly equal to clover for fertilizing. The dry beans when ground make an excellent meal for feeding to milch cows. When roasted and ground they form an excellent substitute for coffee. Sow half a bushel per acre broadcast, or plant in drills three feet apart, and one to one-and-a-half feet between the plants, dropping two or three beans in each hill, which will require one gallon per acre.
- Canada Field Peas. For fodder, in mixture with oats, sow at the rate of two bushels each per acre, or sown alone at the rate of three bushels per acre for plowing under. Used as feed for pigeons.

VETCHES.

- Vetches—Spring Tares. (Vicia sativa.) Sown broadcast at rate of 1 to 1% bushels to the acre, like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for peas.
- Sand, Winter or Hairy Vetch. (Vicia villosa.) Thrives on poor, arid, sandy soils. Is sown either in fall or spring, and generally mixed with rye as a support to the plants. Grows to a height of from three to four feet, and can be cut twice for fodder, first as soon as the bloom appears, and then it can be again cut for the seed. The plant is perfectly hardy, and the produce is recommended as most nutritious. Should be sown at the rate of 1½ bushels to the acre.

- Kaffir Corn. Produces two to four heads from a single stalk. Stands drought wonderfully, and yields paying crops of grain or forage, even in dry seasons when corn has utterly failed. The whole stalk, as well as blades makes excellent fodder, and all stock eat it greedily. Sow in rows three feet apart, five pounds per acre; broadcast, 15 pounds per acre.
- wild Rice. (Zizania aquatica.) Valuable as a forage plant on inundated lands and along the shores of marshes. As an attraction for wild fowls it is invaluable. The seed should be sown in the fall in six inches to six feet of water, having soft mud bottoms where there are few weeds.
- Sunflower, Mammoth Russian. May be grown to great advantage in waste ground, from early spring to the latter part of July. An excellent and cheap food for fowls. Plant 10 to 12 lbs. per acre.
- Teosinte. (Reana Luxurians.) The stalk can be cut several times during the season. Should not be planted until the soil is perfectly warm in spring. Requires about four pounds of seed per acre.
- Dwarf Essex Rape. A forage plant of highest value. It can be sown in April for an early crop, and for fall crop in July, August and September, and still later further south. It is sown broadcast, 6 lbs. to the acre, but is better drilled, in which case 3 lbs. to the acre will suffice. In a few weeks from the time of sowing, sheep, hogs or cattle can be turned on it; all reports agree that they gain weight faster on this than on any other fodder, as it can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen, Dairymen and Farmers have proved its value.

OATS.

Broadcast two to three bushels to the acre.

- White Bonanza. One of the earliest and best Winter Oats; very prolific.
- Red Rust-Proof. These are the standard oats of the Southern States, yielding large crops when all other sorts were destroyed by rust. It is a large, heavy, reddish looking berry, very prolific.
- White, Black, also Mixed.

BUCKWHEAT.

- Should be sown about the middle of June, broadcast, using from three-quarters to one bushel to the acre.
- Japanese. This new sort has proven to be much earlier and more productive than any other variety. The grains are very large and of a rich brown color. It excels all in yield and earliness.
- Silver Hull. A very good and popular variety. The grain is of a light gray color, is rounder than the common variety, has a much thinner husk, matures earlier, and yields a half more to the acre.

SORGHUM, OR SUGAR CANE.

- Plant in drills three quarters to one bushel; broadcast, 1 to $1\frac{1}{2}$ bushels to the acre.
- Sorghum is being used extensively as a green food for cattle, horses and mules; it is a sure crop, being a great drought resister and an immense yielder, producing many tons of most nutritious green food to the acre. Specially fine for food for milch cows when pasture is short.
- Early Orange Cane. A strong grower: much more juicy than any other variety. The stalk is heavier, and a little later than the Amber.
- Early Amber Cane. This popular and well-known variety is the earliest, and makes the finest quality of both sugar and syrup.

BROOM CORN.

Plant eight to ten quarts to the acre.

- Improved Evergreen. The best for general cultivation; brush firm, of good length, and bright green color.
- Dwarf. Grows from three to four feet high, with straight, smooth brush.
- California Golden. A strong growing variety, much resembling the Evergreen, but longer brush, and a bright golden color when ripe.

(Kartoffel, Ger.)

We select our Seed Potatoes in the best northern districts and expressly for seed purposes. As prices are liable to vary, we shall be pleased to give quotations on application. They are put up in barrels of about 23/4 bushels each.

Burbank's. A white-skinned, medium early variety, with

Seed Sweet Potatoes.

Yellow and Red Jersey. Red Bermuda and Southern Queen. Write for prices. Ready for shipment about April 1st.

Artichoke, Jerusalem. This makes an enormous yield, and a most nutritious and health-preserving hog and cattle feed. They also produce an immense quantity of tops, of which cattle, horses and mules are very fond, and which makes excellent food when properly cured. Plant in rows about four feet apart, dropping the tubers fifteen inches apart in the rows. It requires about three bushels to plant an acre. The tuber can be divided same as potatoes. ..50c peck; \$1.25 bushel; \$3.00 barrel.

SPRING WHEAT AND BARLEY.

Owing to market fluctuations, will quote prices on application, stating quantity wanted.

FIELD CORN

Hemp Seed. We are large handlers of Domestic Hemp Seed and will be pleased to quote market prices upon application. Sow at rate of three quarters to one bushel per acre.

Flax Seed. North-western. Sow at rate of three-quarters to one bushel per acre.

Market price.

Seed Rye. North-western. Sow at the rate of one and a half to two bushels per acre.

Market price.

The Prices Quoted are Subject to Market Changes. When In Need of Large Quantities, we will be pleased to submit Samples and Quote Lowest Market Price.

Seeds of ROOT CROPS for Stock.

MANGEL WURZEL.

Five to Six Pounds of Seed Required Per Acre.

The importance of this crop for stock cannot be over estimated. The results from their use are wonderful, as shown in the improved health and condition of animals, the increased yield in milk, and the saving of hay. Can be raised at a trifling cost, and yield immense crops if the soil is rich. They make a heavy growth; the rows should be at least 2 feet apart.

SUGAR BEET.

Are not as heavy yielders as Mangels, but superior quality, containing a large amount of saccharine matter; thousands of acres are planted with Sugar Beets for manufacturing sugar. Excellent for feeding cows, improving quantity and quality of milk.

CARROTS.

TURNIP.

See Page 15.

All Seeds in Packets, Ounces and Quarter Pounds only, are sent free by Mail, at prices quoted; Half-pounds, Pounds, Pints, Quarts, and larger quantities if to be sent by mail, postage must be added to prices quoted at the rate of ten cents per pound and sixteen cents per quart.

FERTILIZERS.

SHEEP MANURE—El Paso.

This is a pure, natural manure, and a nutritious food for plants. Its effect is immediate, much more lasting and beneficial than guano or any other manure. It is the best of all manures for mixing with the soil for green-house plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effects. Nothing equals it for use on flower beds or for the vegetable garden Especially valuable for lawns, contains all the constituents for promoting a quick, luxuriant growth, and a rich green color. No raking-off required. No seeds of foul weeds in it! No offensive odor! It is clean to handle! Absolutely safe to use in any quantity or in any manner.

Directions.—For lawns, use at the rate of from 500 to 600 pounds per acre. For pot plants, mix one part of sheep manure to six parts of soil. For use in the vegetable garden, spread over the surface and dig in. Being soluble, it readily makes a safe liquid manure—one pound to five gallons of water per day can be safely used. This is a pure, natural manure, and a nutritious food

readily makes a safe liquid manure—one pound to five gallons of water per day can be safely used.

Pulverized, per 1b., 5c; 6 lbs., 25c; 13 lbs., 50c; 25 lbs., 75c; 50 lbs., \$1.25; 100 lbs., \$2.00; per ton. \$35.00.

Natural state, not pulverized, 100 lbs. \$1.50; per ton, \$27.00.

EXCELSIOR PLANT FOOD.

This is a most useful fertilizer for all kinds of plants raised in pots. It produces a rapid and vigorous growth, and an abundance of flowers. Odorless, and takes the place of liquid manure. Drives insects out of the soil.

Package, containing food for 20 plants for 3 months, 15c; 3 for 40c; if by mail, add 8c per pkg.

Large pkg. containing sufficient plant food for 20 plants

Large pkg., containing sufficient plant food for 20 plants for one year, 25c; 3 for 65c; if by mail, add 18c per pkg. Each package contains full directions.

BONE, FLOUR OR DUST.

This is ground very fine, decomposes more rapidly in the soil than the coarser grades, and is therefore more quickly beneficial......Per lb., 5c; 10 lbs., 45c; 100 lbs., \$3.00.

BONE MEAL.

This finely pulverized ground bone is excellent for rose eulture. It decomposes very rapidly, and is more quickly effective than the coarser grade. It is excellent for mixing with the soil for potting. 5 lbs., 25c; 10 lbs., 45c; 25 lbs., \$1.00; 100 lbs., \$2.50; 200-lb. bag, \$4.00; per ton, \$35.00.

BONE, CRUSHED OR COARSE.

This is largely used for pasture lands, being rather slow but permanent in action, and it is indispensable in the grapevine borders—for fruit trees, small fruits, etc.—where a lasting festilizer is required. Per lb., 5c; 10 lbs., 45c; 100 lbs., 4 lbs., \$3.00.

PERUVIAN GUANO.

One of the most powerful stimulants for plants and one of the most powerful stimulants for plants and growing crops. One pound of Guano to 20 gallons of water will be sufficiently strong for a single watering each week, and more efficient than repeated waterings with weaker solutions. Per lb., 10c; 5 lbs., 40c; 10 lbs., 75c; 100 lbs., \$5.00.

AMMONIATED BONE MEAL and POTASH.

This is now the leading fertilizer, and is especially valuable for plants, potatoes and grain.

ANALYSIS.

Nitrogen	2.47	to	3.29
Ammonia	ο.		4.
Total Phosphoric Acid	8	6.6	10.
Available Phosphoric Acid	6.	6.6	8.
Water Soluble Phosphoric Acid	4.	66	6.
Potash (k 2 o)		6.0	3.

5 lbs., 25c; 100 lbs., \$2.00; 200-lb. bag, \$3.00; half ton, \$13.50; per ton, \$25.00.

PACIFIC GUANO.

For several years we have been handling Pacific Guano, and the universal verdict from all who use it is, "It is the best fertilizer we have ever used." Per lb., 10c; 5 lbs., 25c; 25 lbs., 75c; 100 lbs., \$2.00; per bbl. of 250 lbs., \$3.75; per half ton, \$14.00; per ton, \$26.00.

COTTON SEED MEAL.

This makes an excellent fertilizer for old lawns and meadows, being odorless and free from weed seeds. Apply at the rate of 200 lbs. per acre. Per bag of 100 lbs., \$1.50; per ton, \$26.00.

LAND PLASTER

Is adapted to a great variety of uses, and sales are largely increasing as its value becomes better known. If applied as a top dressing for Grass and Clover crops in the spring, it greatly increases the growth and yield of same, in fact its use is almost certain to insure a good stand of Clover. If it is sprinkled in stables, poultry houses and on manure piles it will prevent ammonia from vaporizing, thereby greatly increasing the value of farm manure. On account of its economical usefulness and effectiveness it should be liberally used on every farm. Per bbl., about 275 lbs., \$1.35; six bbls. or more, \$1.25 per bbl.

ANTI-GRUB COMPOUND.

Our attention has been repeatedly called to the fact that during the summer time large patches of our lawns die out without any apparent cause, and upon close and careful investigation we have found that this was largely caused by the old White Grubs, which destroy the young roots and shoots of the grass, with the result that the grass dies, and at the same time they exhaust the soil. To remediate this will we have placed apparent the result that the grass dies, and at the same time they exhaust the soil. dies, and at the same time they exhaust the soil. To remedy this evil, we have placed upon the market a combination of chemicals that are intended to destroy the Grubs and also supplying a fertilizer calculated to cure sour land and prevent the growth of Moss and Fungii, and supplying all necessary ingredients to produce a luxuriant growth of grass. This mixture has been largely used on our Cemeteries, Parks and Lawns, with most gratifying results. Apply at rate of 200 to 300 lbs. per acre. 50 lbs., \$1.50; 100 lbs., \$2.50.

FERTILIZER INGREDIENTS.

For the benefit of those who want Fertilizers for special purposes, or for mixing with stable manure, we keep on sale ingredients that contain the elements to make complete Fertilizers, viz: Nitrogen, Potash, and Phosphoric Acid. The ingredients we sell contain these elements in most available form for plant food.

Nitrate of Soda. A natural product of the mines of Chili, South America. Contains sixteen per cent. Nitrogen, equal to twenty per cent. Ammonia. Send for special pamphlet giving full directions for use Price per 100 lbs., \$3.50.

Kainit. A natural product of the mines of Germany, containing nearly thirteen per cent. pure Potash, also a large percentage of Magnesia, Sulphate of Lime and Salt. Mixed with stable manure, 11/2 pounds per day for each animal, will double the value of the manure, by preventing the waste of the Nitrogen-Ammonia. Use 200 lbs. per acre.

Mineral Phosphate. A highly concentrated phosphate, made from the deposits of the bones of sea animals. Contains $\textbf{from thirty-eight to forty-three per cent. of available Phosphoric Acid.} \quad \textbf{Use 50 to 60 pounds per acre.}$

Price. \$3.50 per 100 lbs.

Briefly stated, the leading effects of the different fertilizer elements are as follows: Nitrogen (Ammonia) produces a vigorous growth of the plant, and is particularly valuable for all vegetable crops and as a top dressing for grass. Potash and Phosphoric Acid increase the yield and quality of crop products, and should be used on all grain crops.

Moss Green Sheet. For hanging baskets, etc. Per bale, 40c. Per bush., \$1 25; per bbl., \$2.75. Peat, Jersey. Fibrous and rotted...... Potting Soil. This is a mixture specially prepared by us, and such as used at our own Greenhouses. It is suitable for all ordinary plants and bulbspeck, 25c; bushel, 75c; barrel,, \$1.50.

INSECTICIDES AND FUNGICIDES.

Bordeaux Mixture. A valuable and indispensable fungicide for grape growers, ensuring larger crops and finer grapes, and preventing failure. Successful against black rot, mildew and rust. Being in liquid form, it is very convenient to handle. One gallon will make fifty gallons of spraying liquid Quart 40c; gallon \$1.00 Copper Sulphate. For early spraying and making Bordeaux mixture.

Per 1b., 10c; 10 1bs. 80c; 100 1bs. \$7.50

Fir Tree Oil (Soluble). It frees plants of nearly all insects to which they are subject and for the following it has no superior: Mealy Bug, Scale, Red Spider, Aphis (black and green), Thrip, Blight Worms and Slugs; also a valuable remedy for animal parasites and insects. Dilute with soft or rain water. Sprinkle or spray on with Vaporizer

Pir Tree Oil Soap. This article contains no poison, yet is quite effective in destroying Red Spider, Mealy Bug, Aphis, etc. It can also be used in the garden against potato bugs, cabbage worms, currant worms, black fly, etc.

1/2 lb. tin 25c; 2 lb. tins, 75c

Flour of Sulphur. Used to prevent and cure mildew on plants

If sent by Mail, add 15 Cents per Pound Extra for Postage.

WIRE FOLDING PLANT STANDS.

The most compact, strong, durable Plant Stands—They pack closer than any other plant stand for shipment. The ends are made of flat steel and have porcelain castors. Can be opened or folded in a few seconds time by simply spreading the stand apart at the bottom, and dropping the cross bars into their places. The construction of the shelves or trays are such that there is more room for the pots and foliage than any other plant stand that takes the same amount of room on the floor.

for the pots and forego than all of the pots and forego than all of room on the floor.

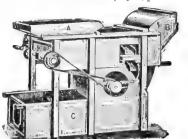

3 Tray Wire Stand—Trays 714 inches wide x 30 inches long. \$3.00

LAWN MOWERS.

Genuine Philadelphia Lawn Mower.

The Philadelphia Lawn Mower has stood the test for years, and is still acknowledged to be one of the best and a strictly High Grade Mower.

Style K.-5 blades, 10-inch wheel, 6½-inch cylinder. Single Pinion, geared on both sides, The greatest diameter of cylinder, with five blades, insures fine cut, and, with its large driving wheels, is light running.

14 in., \$6.00; 16 in., 6.60; 18 in., \$7.25; 20 in., \$8.25. Style C.—4 blades, 8½-inch wheel, 5½-inch cylinder. This style medium high wheel is to sup-ply a demand for a mower which has real merits, and is light running, durable and easy to handle.

to handle.

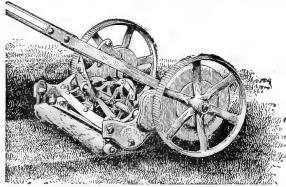

14 in., \$5.00; 16 in., \$5.75;

18 in., \$6.25; 20 in., \$7.00.

Style M.—3 blades, 7-inch wheel, 5½-inch solid cylinder, with blades bolted on. This is the original Philadelphia 1870 pattern mower, and for general purposes is very popular, adapted for rough as well as smooth lawns.

for rough as works 14 in., \$5.00; 16 in., \$5.75; 18 in., \$6.25; 20 in., \$7.00.

CADET LAWN MOWER .- 14 in., \$3.00; 16 in., \$3.25.

Coldwell's Ball-Bearing Lawn Mower.

Ball-Bearing Lawn Mowers have not been a general success, for the reason that the bearings wear out faster than other bearings, and the adjustments are too intricate for the average user of a lawn mower. We have invented a ball-bearing which effectually overcomes both of these objections.

The cups, cones and balls used in this Mower are turned down from tool steel, and are tempered to a degree of hardness that insures durability.

We guarantee it to do a greater variety of work and do it easier than any other Ball-Bearing Mower now on the market.

Ball-Bearings, Self-Adjusting, Easiest Working, Finest Finished and Longest Lasting-16 in,, \$8.00; 18 in., \$9.00; 20 in., \$10.00.

Coldwell's Imperial High Wheel Lawn Mower.

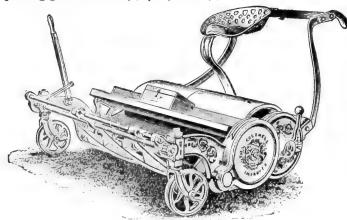

The best lawn mower is the one that does the best work, runs the lightest, is the easiest to handle, is most durable, and will adapt itself to the greatest variety of grass. We claim that our Four-Blade High Wheel Imperial embodies that our rour-Blade High wheel Imperial embodies the above to a greater degree than any other mower made, and is just the mower for use on 90 per cent. of our lawns. The work manship upon it is superior to that of any other make. The joints are closely fitted, insuring a noiseless, light-working and durable machine. It is nicely balanced, enabling the operator to handle it with ease.

16 in., \$7.50; 18 in. \$8.50; 20 in., \$9.50.

Chain Roller or Golf Mower.

This Mower is made to meet the demand for a machine that will more perfectly cut borders, verges, etc., and yet retain all the other features necessary in a mower for genretain all the other features necessary in a mower for general work. The great advantage of this mower is the substitution of a ticycle chain for the gears generally used in this style of mower. This reduces the friction to a minimum. The machine with six blades is highly recommended by most of the leading golf clubs in America for work on within greats.

putting-greens. 16 in., \$14.00; 18 in., \$16.00.

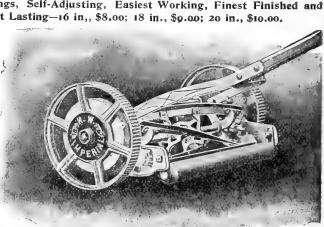

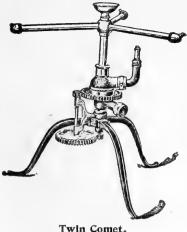

Coldwell Improved Horse Lawn Mower.

This well known standard Mower has side draft attachment, to enable the horse to walk on the cut grass only, and caster rollers, which will not mark the lawn. Evenness of cut is assured by an adjustment which raises or lowers the two sides at the same time by means of a simple lever movement; the same lever serves the purpose of raising the knives from the ground when driving over gravel walks or roads. The mowers are fitted up with steel shafting and composition split bushings, and great care is taken to have the workmanship perfect.

EACH MOWER IS GUARANTEED TO GIVE ENTIRE SAT-ISFACTION TO THE PURCHASER.

25 Inch, no shafts, \$38.00; 30 inch, complete, \$65.00; 35 inch, complete, \$78.00.

LAWN REQUISITES.

Twin Comet Lawn Sprinkler.

The globe, or body, of the sprinkler is made in two parts, and by means of the swittly revolving arms and intermediate gears the upper half is made to revolve slowly, carrying the hose nozzle, from which a full stream of water is thrown far out beyond the sprinkle of the arms.

With an ordinary pressure of water, 30 pounds or upwards, it will thoroughly sprinkle an area of 80 feet in diameter. The nozzle and tips on end of arms are adjustable, and can be set so as to sprinkle any desired space; or the nozzle can be set perpendicular to send the water upwards in a straight stream like a fountain. A perforated disc or rosette can be attached in place of the nozzle tip, discharging instead of a solid stream a fine mist at the center of the sprinkle of the arms. With the exception of the legs, all parts are of solid brass, heavily nickled. Will sprinkle four times greater area than any other sprinkler made. Pirce, \$5.00.

Rainmaker Lawn Sprinkler.

With revolving wings, strongly made. It is by all odds the finest sprinkler of its class on the market. It throws a beautiful spray. Solid brass; nicely finished; base Japanned. The sled enables the sprinkler to be moved about the lawn by the hose, and by a cord attached to hole at rear of sled. Price, \$1.00.

Champion Lawn Rollers.

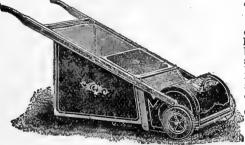

The cylinders or sections are clean, smooth castings, made to run close together, and yet revolve independently, thus doing better work. Weights are attached to the axle to balance the handle and hold it up.

> No. 1-2-Section, 15 in. long and 15 in. in diameter; weight about 125 lbs. \$6.00

Horse Boots.

Designed for use on Lawns, Parks, Tennis Courts, etc. The brush revolves very rapidly, throwing the litter backward from its under surface. Immediately litter backward from its under surface. Immediately behind the brush and parallel with it, athin shoe passes along over the ground, with its upper surface inclined. If sticks, stones or leaves are encountered, the shoe does not allow them to pass under it, but provides a passage over it into the hopper. The hopper can be dumped or taken out and emptied. It takes only a few minutes to go over a large lawn. The machine weighs 28 lbs., is 25 inches wide, 21 inch brush. Price, \$10.00.

LAWN SWINGS. Norwood Two=Passenger Lawn Swings.

The most desirable lawn swing in the market. The seats

Norwood Four-Passenger Lawn Swings.

The strongest and roomiest lawn swing on the market. When four large people occupy it they are not in the least crowded. The frame is made extra heavy and strong, \$6.00. HOSE, RUBBER.-In 50 feet lengths.

SPRAY PUMPS.

HESE spray pumps are constructed entirely of brass, a material that is not affected by the poisonous arsenites used in different formulas for spraying fruit trees, vines and shrubbery. They are so arranged that the labor of pumping is all done on the downward stroke of the piston and nothing on the up. The effect of this operation while pumping is to hold the pump down. The foot rest steadies the pump, holding it in proper position.

They are provided with a large air chamber, and have ball valves; the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a continuous spray, and is not affected by the movement of the plunger. The operator is enabled to keep a constant pressure on the nozzle of from 50 to 100 lbs, with very ordinary exertion. Will throw a solid stream 50 feet, and are of unusual value for washing windows, buggies, and extinguishing fires, sprinkling lawns, flowers, etc. For spraying are arranged so as to discharge a fine jet in the bottom of the bucket to keep the solution thoroughly mixed and agitated, a feature poeculiar to these pumps only, and a very necessary feature to a spray pump. The pumps are also provided with a sprinkler for flowers.

We advise spraying on clear, bright days during Winter and early Spring, because a stronger solution can be used while trees are dormant, and the San Jose Scale and all other insects can be destroyed more readily than can be done when trees are in foliage.

Improved Barrel Brass Spray Pump.-Improved Barrel Brass Spray Pump, complete with 5 feet of ½ inch three-ply discharge hose and Myers' graduating Vermorel nozzle. Price.

Extension Pipe, 8 feet, 40 cents.

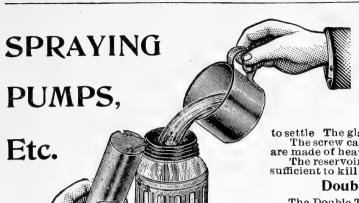

PIPE EXTENSIONS.

ans article seems to be so generally misunderstood that we wish to call particular attention to it. You will readily understand that a fine mist spray cannot be thrown over twelve to fifteen feet, and it is positively necessary that an 8 foot pipe extension be used with each spray pump. By this means the water is carried solid to a distance of ten feet and sprayed from that point, which enables the user to reach the highest tree.

In addition to the above we have the context of the second of the secon

In addition to the above we handle several other styles of Spray Pumps, including Hydraulic Spray Pumps, Double Acting Barrel Spray Pumps, etc. Send for our Special Catalogue.

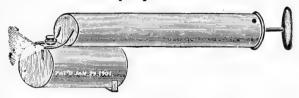

Double Tube Lightning Insect Sprayer No. 20.

Double Tube Lightning Insect Sprayer.

The Utica Insect Sprayer.

Gives a long easy stroke Gives a long easy stroke that supports a fine misty spray of full volume for twice the length of time accomplished by any other sprayer. Plunger rods heavy. Best calf leathers re-inforced with our spring valve spreader, and very strongly made in every part. No. 10, all tin. 1½ quart tanks..... 50c No. 7, brass tanks, 11/2 quart" 75c

Utica Insect Sprayer.

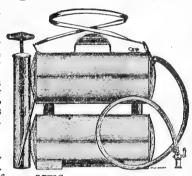

Blizzard High Pressure Sprayer.

The handiest and easiest working sprayer. Holds one

Double Cylinder High Pressure Sprayer.

Made of heavy galvanized iron, strongly braced and reinforced in every part. Head swell-

every part. Head swelled and double seamed. Heavy cast brass filler, cap and screw. Strong 2-inch force pump, with heavy rods, best calf leather plunger and spring brass spreaders for leathers. Brass ball check valves. The most perfect working sprayer ever invented. Adapted for all classes of spraying. This sprayer, when filled and charged, which takes half a minute, will spray continuously for 15 minutes, and will throw a stream thirty feet high. It is especially fine for large work in potato fields, vine-yards, tobacco plantations, fruit tree spraying, and green house work. Also for applying disinfectants in barns, etc. \$4.25.

arms.

Auto Compressed Air Spray.

This is the very best Compressed Air Sprayer now on the market. Will not get out of order. Can be suspended from the shoulder, thus allowing the free use of

A few strokes of plunger in air chamber will compress enough air to discharge the This means that the entire contents and make a continuous spray for nine minutes. $sprayer can \ be\ charged\ in\ fifteen\ seconds, when\ it\ will\ work, uninterupted ly\ long\ enough$ to spray a quarter-acre of potatoes.

LENOX KNAPSACK SPRAYER.

For Garden, Field and Small Fruit Culture.

One man does the work of twelve, and need not stoop down. Spray as fast as you walk. No waste whatever. Spray stops by releasing the pressure of the thumb. No machinery to get out of order. Has an agitator on left side to stir the liquid. Never rusts. Never out of order. Adjustable to man or boy. To spray trees and vines turn nozzle up, We recommend it to be the best and cheapest one on the market... Price, \$3.00 each.

Extra Tube. Rubber bulb and rose to work with both hands, \$1.50. Rubber bulbs, 25c each.

Auto Spray, Compressed Air.

LADIES' FAVORITE SPRAY.

It throws a beautiful misty spray; fine for window gardening and flowers in the house Sprays downward or upward, getting on the under side of the leaves. Excellent for tobacco and cigar manufacturers where they need a fine spray.......Price, 90c.

The Lenox Sprayer.

The best Pruning Shears; quality unsurpassed. The celebrated DRAW CUT. Is hand forged from the best quality of shear steel. It is fitted with the best steel machine turned bolt and Norway nut. Best hard maple handles, painted red or shellac. This shear has a slot in blade whereby we get a sliding cut, and the shank of the blade is so constructed as to have a hinge movement, enabling the operator to get a powerful leverage, and to cut a 2-inch limb with comparative ease.

"Planet Jr." Farm and Garden Tools.

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue free to any who desire it. "Planet Jr." goods are standard machines; the best, and you can rely on getting bottom prices from us on any of the "Planet Jr." goods.

A seeder that does not drop in hills is fast becoming a thing of the past. Why? Because all crops that are to be grown from seed and thinned to a regular stand, should be planted in hills at just the distance apart the plants are desired, for in drilling, unless the seed is sown unnecessarily thick, there will not always be a plant at the proper spot, and the crop is therefore irregular. This machine not only sows in a continuous row, but also drops in hills, 4, 6, 8, 12 and 24 inches apart. We can heartily recommend it. Price, \$10.00

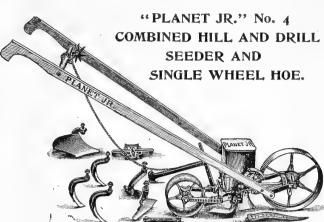

"Planet Jr." No. 12 Double Wheel Hoe, Cultivator, Rake and Plow.

This tool combines in itself the good points of its predecessors, with valuable new ideas. It has llin. wheels, which can be set at four different distances apart. The frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and the arch is of stiff steel, unusually high. The design of the frame is new, allowing the changes of the tools to be made without removal of the nuts from the standards. The machine has an unusually large equipment, seven pairs of tools in all, and the amount of work possible with this machine is almost incredible, covering the whole range of wheel hoe work both in the garden and on the farm, and has our unqualified endorsement. Price, complete, \$6.50.

Probably no other cultivating machine is so widely known as the "Planet Jr." No. 8 Horse Hoe and Cultivator. It is so strongly built as to stand incredible strain, yet it is light and easily handled. Every part of the tool is perfected to make it valuable to the intelligent farmer, who knows the best is always the cheapest.

This is exactly the same style of seeder as the No. 3 "Planet Jr." Hill Dropper. It is smaller in capacity, though still of good size. holding two quarts. It drops in hills the same as the No. 3, and in drills any thickness, handling the smallest paper of seeds perfectly. It is simple, durable and very light running. Thrown out of gear instantly and the flow of seed cut off, by simply raising the handles. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family. Price, \$10.00. As a Drill only, \$8.00.

"Planet Jr." No. 17 Single Wheel Hoe, Cultivator, Rake and Plow,

This latest and best Single Wheel Hoe has an 11-inch wheel with broad face, and a conveniently arranged and very valuable set of tools. It is very light, strong and easy running. Has adjustable handles and frame, and is the most perfect Wheel Hoe for market gardeners and private places. Frame changes in height; and the wheel to the other side of the frame, to allow of hoeing both sides of the row at one passage. Price, \$4.50.

"Planet Jr." Twelve Tooth Harrow, Cultivator
and Pulverizer.
PRICES:
Without Pulverizer or Wheel, \$5.30
Without Pulverize, \$6.40
Complete, \$8.00

This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame, and the chisel shaped teeth cut an inch wide, each. Hand levers regulate, width and depth while in motion, and the pulverizer prepares the ground capitally for the Seed Drill or for plant setting, and controls the depth of the rear teeth. It contracts to 12 inches and expands to 32 inches. Cultivates without throwing earth upon the plants, and the smooth, round throated teeth turn strawberry runners without injuring them.

For cutting strawberry runners, we make a special attachment consisting of a 10-inch flat steel disk, mounted on an out rigger. Price extra, \$1.75.

POULTRY SUPPLIES.

PRICES SUBJECT TO CHANGE.

Rust's Egg Producer.

You can get plenty of Eggs at all seasons by using Rust's Egg Producer. It makes fowls vigorous and healthy, shortens the moulting period, prevents and cures leg weakness, etc., and is just what is needed to make poultry-keeping the most profitable operation on a farm. You can feed Rust's Egg Producer every day for two or three weeks, at a cost of one cent for each hen, and get surprising results.

One-lb. box, 25c; 2½-lb. box, 50c; 6-lb. box, \$1.00; 10-lb. box, \$1.50; 25-lb. keg, \$3.50.

If by mail, add 16 cents a pound for postage.

RUST'S HAVENS' CLIMAX CONDITION POWDERS.

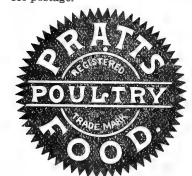

No Owner of Poultry or Stock should be without it.

It cures diseases and keeps stock and fowls healthy; the only real cure for gapes and fowl cholera; expels worms from horses, etc.; gives great and lasting benefits in heaves, without the slightest injury.

It makes hogs thrive and fatten; increases and improves the production of milk.

Price, 13-oz. package, 25c; 2-lb. package, 50c; 5-lb. box, \$1.00. If by mail, add 16 cents a pound for postage.

Pratt's Poultry Food

Will increase the quantity of eggs and make hens lay regularly. It cures chicken cholera, roup, gapes, worms, rheumatism and all diseases. It produces bone, muscle and feathers. It makes the comb red, feathers lay smoothly, eggs fertile, and makes larger fowl. Molting fowl, when fed Pratt's Poultry Food, pay largely by their early laying qualities. Also, young chickens grow quickly, healthy and free from all disease. Turkey, duck, geese and pigeon raisers find it profitable to feed Pratt's Poultry Food. No sickly, droopy fowl are ever seen where it is fed.

26-z. size, 25c; 5-lb. size, 60c; 12-lb. bag, \$1.25. If by mail, add 16 cents per pound for postage.

for postage.

Imperial Egg Food.

For all Varieties of Laying Fowls, Young Chickens, Ducks, Geese and Turkeys.

Price, p^r lb. 25c; $2\frac{1}{2}$ lbs., 50c; 6-lb. boxes, \$1.00; 10-lb. boxes, \$1.50; 25-lb. kegs, \$3.15. If by mail, add 16 cents per pound for postage.

Columbus Poultry Food.

An excellent food for chickens, turkeys, ducks, geese and pigeons. Molting fowls should never be without it. Young chicks are free from diseases if given this food, and grow healthy and develop rapidly.

Price, 28-oz. size, 25c; 5-lb. size, 60c. If by mail, add 16 cents per pound for postage

Baum's Poultry Food.

The surest egg producer The quickest and cheapest means of fattening for the market. It is just the thing required to strengthen the chicks—keeps them robust and free from disease. It makes the chickens develop much sooner, and makes early layers. 2-lb. box, 25c; $4\frac{1}{2}$ -lb. box, 50c. If by mail, add 16 cents per pound for postage.

Cyphers Egg Stimulant.

Is a scientifically-prepared and perfectly balanced compound; at once a tonic and condition powder for promoting the general health, and a gentle stimulant to the egg-producing organs of the fowl, strengthening and stimulating them to a normal, healthy action, resulting in the increased production of strong, fertile eggs.

Nothing but absolutely pure drugs are used in its manufacture and no harmful results follow its use, as is the case with so many other so-called egg producers.

Each box contains sufficient powder for treating one bushel of food. Cyphers Egg Stimulant will increase the egg yield and we give a positive guarantee with every box to refund the money if the results claimed are not accomplished when directions, as printed on the label of each box, are followed.

Price, 25 cents. Price, 25 cents.

Rust's Havens' Roup Pills.

The pills act directly on the glands and mucous membrane, allay all tendency to fever, and carry off all morbid matter from the system. They are entirely free from everything harmful, and the best remedy ever discovered for Roup, Catarrh, Colds and Distemper. 25c per box of 48 pills.

Conkey's Roup Cure

Will positively cure roup in all its forms. It is simply put in drinking water and the chicken takes its own medicine. It prevents coids, and is unequalled for canker, especially in pigeons.

One 50 cent package makes 25 gallons of medicine; \$1.00 package makes 75 gallons of medicine. So it is the best and cheapest cure of its kind in the market.

We guarantee each and every case where Conkey's Roup Cure is used; if it fails we refund the money.

Directions in every package. Small package, 50c; large package, \$1.00.

American Poultry Food.

This celebrated food is manufactured from wheat, corn, oats and barley. The grain is carefully selected, thoroughly kiln dried, roasted and finely ground. It is intended for the grain portion in the morning mash. It is prepared by steaming or scalding the same as any other ground food. Where it is the custom to mix vegetables, meat meal, etc., in the morning mash, these can be used in conjunction with American Poultry Food.

American Poultry Food is a food, not a condition powder, and is a prepared, ready-mixed daily ration.

If you are raising chicks for the market, there is no food that will force them so fast and produce such all round development and perfect quality as American Poultry Food as a morning mash. 5 lbs., 20c; 25 lbs., 75c; 100 lbs., \$1.75.

POULTRY SUPPLIES. Continued.

SPRATT'S PATENT POULTRY FOOD.

Spratt's Patent Chick Meal. Per lb., 10c; 3 lbs., 25c; 10 Poultry lbs., 75c; 50 lbs., \$3.00; Pheasant 66 100 lbs., \$5.50. Game

If by mail, add 16 cents per pound for postage.

Beef Scraps. The great demand among poultrymen for a reliable article in scraps has induced us to put on the market a quality of goods that has at once been appreciated by all poultry raisers. Per lb., 5c; 6 lbs., 25c; 131bs., 50c; 1001bs., \$2.50.

BONE GRANULATED—Coarse and Fine Ground. Can be fed like any other food in grain, about one handful for every five fowls daily, or every other day. In either manner it furnishes a valuable food for poultry at all seasons of the year. Per lb., 5c; 6 lbs., 25c; 13 lbs., 50c; 100 lbs. \$3.00

BONE MEAL PURE. For mixing once a day with soft feed, this is unsurpassed. Millet Poultry. Large grain, makes an excellent bird and chick food. Per lb., 5c; 61bs., 25c; 50 lbs., \$1.50; 100 lbs., \$3.75.

RICE, Rough or Unhulled. An excellent food for poultry and parrots. Per lb., 10c; 3 lbs., 25c; 50 lbs., \$2.50.

SUNFLOWER SEED—Mammoth Russian. The largest of all Sunflowers. We recommend it for poultry of all varieties, Plant a few hills in your poultry yard; the leaves and stalks make fine fodder for poultry. Per lb., 10c; 3 lbs., 25c; 10 lbs., \$2.50.

Buckeye Scratching Food. We have prepared a mixture of about ten different sorts, of grain and seed among these are Buckwheat, Hungarian, Millet, Wheat, Cracked Corn, Oyster Shell, etc. Best food in the market. While present stock lasts, price only 50c bu.; 85c for 2 bu. bag. all of the clover, stalk, leaf and be the best winter agg food; is also.

DARLING'S MEAT MEAL. This food is made from pure, sweet meat and bene. It is rich in albumen and protein, and is a nitrogeneous food of great egg-producing value. Per lb., 5c; 6 lbs., 25c; 13 lbs., 50c; 50 lbs., \$1.25; 100 lbs., \$2.25.

Cyphers' Pure Clover Meal. Contains all of the clover, stalk, leaf and blossom. Pronounced by experts to be the best winter egg food; is also fed largely to growing chicks. Unequaled as a feather and bone maker. Mixed and fed in morning mash, not a particle need be wasted

Cut Clover. The Cyphers short-gut screened clover hav is the best in this

cut Clover. The Cyphers short-cut, screened clover hay is the best in this line. The long sticks and stems are all taken out, thus delivering to you what the fowls can eat up clean. 5c per lb.; 25c for 6 lbs; \$1.00 for 50 lbs.

Mica Crystal Grit. Contains valuable medicinal properties for fowls, such assulphur and iron, and acts as a medicine as well as a grit. Made in three sizes—poultry, pigeon and chick. 5 lbs., 10c; 25 lbs., 30c; 100 lbs., 75c.

Oyster Shells, Crushed. Fine and coarse, 5 lbs., 10c; 25 lbs., 30c; 100 lbs. 65c.

Charcoal, Pulverized. 5c per lb.; 6 lbs., 25c; 50 lbs., \$1,75; 100 lbs., \$3.00.

NEST EGGS—China or Opal, Very popular, and the cleanest nest egg used. with these there is no danger of getting stale eggs mixed with the fresh ones, nor of the hens acquiring a hahit of egg eating. 3c each; 25c per doz. If by mail, add 2c each; 20c per dozen extra.

Prices, postpaid, 25c per doz., 40c for 25; 75c for 50; \$1.35 for 100.

The Smith Double Clinch Leg Bands.

Fastens with two clinches passing through the Band, and turning toward each other in such a way as to form a protection to themselves and take up the ends in such a neat manner as to leave absolutely no exposed corners, ends or loops to come loose, making it at once the best open Bands.

Lambert's Death to Lice. Is largely used by the best poultrymen. For sitting hens it has no equal, keeping them clean, sweet and comfortable without injury to the hen eggs or chickens. 5 oz. pkt., 10c; 15 oz. pkt., 25c; 48 oz. pkt., 50c; 100 oz. pkt., \$1.00.

Cypher's Lice Powder, In offering CYPHER'S LICE POWDER, we offer a powder that we believe to be stronger than any similar preparation on the market. It is carefully compounded and contains no carbolic acid or other chemicals which will injure the fertility of the eggs. It is clean to handle, easy to apply, sure in effect and can be used in the nests

of the eggs. It is clean to handle, easy to apply, sure in effect and can be used in the nests of sitting hens without fear of injuring young chickens. For lice on cattle and horses, ticks on sheep and fleas on dogs, CYPHER'S LICE POWDER is a most effective remedy. 5 oz. pkt., 10c; 15 oz. box 25c; 48 oz. box 50c; 100 oz. package \$1.00.

Lee's Lice killer. A liquid preparation for destroying insects an chickens, hogs and other stock. It was especially designed for killing lice and mites on chickens and hogs without the necessity of handling, dipping, dusting or greasing fowls or animals Per qt., 35c; half-gallon, 60c; gallon, \$1.00.

Cypher's Anti-Fly Pest. A sure death to flies, but it is our aim to drive rather than kill them. To kill flies they must come in contact with the remedy and this annoyance is what we wish to avoid. We, therefore, claim that our preparation is superior to those which have only killing properties. Its effect is lasting. It leaves no gummy substance behind and does not injure the animal's coat. One application instantly relieves horses and cattle of all annoyance from flies, mosquitoes, gnats and insects of all description for resulting in an increased quantity of milk with less food consumed. If your horse is thin-skinned and is troubled by flies, give Cypher's Anti-Fly Pest a trial. It is not always necessary to spray the horses or cattle, for while standing in the barn it is sufficient to spray the sides of the stall and stanchions. Cows sprayed with Cypher's Anti-Fly Pest will produce 25 per cent. more milk. One gallon is sufficient to treat 300 cows. For applying we recommend the Utica Sprayer, described on page 85. ½ gallon, 50c; 1 gallon, 75c.

Persian Insect Powder. We have made arrangements with a large importing firm to supply us with pure Dalmatain or Persian Insect Powder, and can therefore recemmend the article we offer as being strictly pure and fresh, and one that can be relied upon to kill the insect pests of all kinds that prey on our feathered pets. ½ 1b. 15c; 1b. 50c; by mail 65c. Tobacco Dust. A good thing to have about the poultry house. A handful in each nest will keep the lice out. Especially valuable for sitting hens. Per lb., 5c; per 100 lbs. \$3.00.

Tobacco Stems. Excellent for making nests of or scattering among the litter in the hen house, to keep down vermin..... Per lb., 5c; 10 lbs., 30c; bales of about 125 lbs., \$1.50.

BUFFALO U.S.A.

CYPHERS INCUBATORS.

If you are in search of the latest patented, most durably built and best practical incubator manufactured to date, the one that will hatch "the largest number of the strongest and healthiest chicks or ducklings," the Cyphers is that machine.

The Cyphers Incubators are warranted by this company to last ten years without repairs, and are fully *guaranteed* as follows:

To require no supplied moisture.

To be self-ventilating.

To be self-regulating.

To operate with less oil and at less expense than any other make of incubator.

To be fire-proof, having the best, the safest and the most costly built heater attached to any incubator.

To be in all essentials the simplest and easiest to operate and control, requiring less labor and attention than any other style or make of incubator.

No. o Incubator, 60-Egg Capacity,			4	•							Price,	\$14.00

CYPHERS BROODERS.

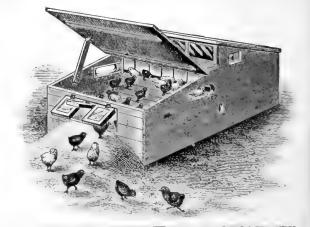

The Cyphers Brooders, like the Cyphers Incubators, are as correct in principle and as durably made as we know how to make them. They are Mr. Cyphers' own invention, have been in use three and four years, have been altered slightly from time to time as experience suggested, until to-day they are practically perfect. The proper test is the actual work they do in the hands of men and women engaged in raising poultry by artificial means. Hundreds

of Cyphers Brooders of the different styles and sizes have been sold, and scores of people, both men and women, have reported their success with them under all conditions.

CYPHERS BROOD COOPS.

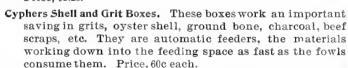

board floor, are water-tight and durable...

Hallock Food and Water Holders. Recommended both as food and water dishes. The tops and bottoms are separable by placing the palm of the hand on top of the upright post, then pressing downward, causing the wires to spread and thus easily releasing the pan. The wires prevent the chicks or fowls from getting into the food or water and soiling it. No better arrangement could be devised, either for outdoor or indoor use.

Cyphers X=Ray Egg Tester. This is an inexpensive metal tester that fits on any ordinary lamp. Price, 30c. By mail, postpaid, 40c.

Cyphers Safety Brooder Stove. This stove has no equal. The safety water pan holds nearly a quart of water and extends out over the entire surface of the oil bowl, thus placing a sheet of cold water between the oil bowl and the flame jet. The oil bowl and water jacket are of sheet brass, and the oil bowl is seamless, thus avoiding all danger of leaks. We strongly advise against using a lamp in a brooder. The Cyphers brooder stove is not only perfectly safe, but furnishes twice the heat of an ordinary brooder lamp.

Galvanized Sanitary Drinking Fountain. Made of heavy galvanized iron. The best and most convenient fountain on the market. Can be thoroughly and easily cleaned. Is not injured by freezing. Can remove ice in two minutes.

1 gallon, 50c; 2 gallon, 85c. Galvanized Sanitary Fountain Heater. Use a heater and give your chicks and fowls warm water. No expense, no danger. Very little trouble. Lamp burns twenty-four hours. Chickens large enough to be out of the brooder easily drink from it. Great comfort for the poultry-promotes growth increases the eggs

MANN'S GREEN BONE CUTTERS.

Mann's New Bone Cutters are the standard of excellence. A standard which has only been obtained by years of experience. Every mill warranted to cut dry or green bones with the meat and gristle attached without clog or difficulty.

A few reasons why Mann's Bone Cutters are the best.—They cut faster, finer and easier than any other; are the strongest and most durable; will cut dry bones or green bones; have less friction. They have finely tempered steel knives, and are adjustable to cut coarse or fine. They will duplicate in every part. The knives are easy to sharpen; any one can do it. do it. NOTHING WILL MAKE HENS LAY LIKE GREEN CUT BONE.

THE MODEL GRINDING MILL.

An Improved Hand Power Grinding Mill, compactly made of strong and durable

They are intended to grind all kinds of grain, dry bones, shells, roots, barks, salt, etc. The primary object of these Mills is to grind all kinds of feed for chickens and other

domestic fowls and animals.

They are also found to be invaluable to prepare cracked wheat, graham flour and corn meal for table use, and for these purposes alone will pay their cost in a short time and

give a pure unadulterated food.

They are easily adjusted to grind fine or coarse without the use of wrench or other tools. The Buhrs are made of Steel-Alloy Metal, and the most durable grinding surfaces

No. 3 Mill can be furnished with an 8-inch pulley in addition to fly-wheel, if desired. Price, complete, \$10.00.

BANNER ROOT CUTTER.

CHAMPION BALL-BEARING CORN SHELLER.

A Cheap, Good Sheller that Shells. It can be set to shell any corn that grows.

The power gained by using ball bearings makes it run very easy, and saves the expense of a heavy balance wheel. By an ingenious arrangement, the machine can be fastened to any box or plank in half a minute. A single thumb-screw strap holds it securely in place. No bolts or screws required, and no holes to be bored.

No corn sheller can be purchased which contains so many points of superiority and excellence at anything like the price of this wonderful new machine. It is guaranteed to do the work satisfactorily. Price, \$2.00.

EASY CORN SHELLER. A good, cheap Corn Sheller....

SWINGING FEED TRAY FOR POULTRY.

They are made of Galvanized Iron; are water tight, and are equally useful for

Hens can not scratch the food out or the dirt in. Weight of hen tips the tray and throws her off. Upper rod tips up also if hen tries to roost over pan. Legs fasten anywhere. 18-inch size, \$1.00. 27-inch size, \$1.25. 36-inch size, \$1.50.

MANN'S CLOVER CUTTER.

Cuts Hay or Clover, either dry or green. Every revolution of the balance wheel produces twelve cuts, which is four times as fast as the ordinary Clover Cutter.

THE PHILADELPHIA POULTRY MARKER.

Where a person has only a few chicks to keep track of, the Philadelphia Poultry Marker will serve the purpose admirably. The marker is made in two sizes, one for chicks and one for adult fowls. The sizes of holes punched are shown by the black dots printed on one side of the marker. Price, 25 cents.

PILLING'S CAPONIZING INSTRUMENTS.

The Geo. H. Pilling Company has had forty years' experience in manufacturing high-class surgical instruments, and any one purchasing a set of their caponizing instruments will find he has made no mistake. We will send with each set of Pilling's Caponizing Instruments a booklet, entitled "Complete Guide for Caponizing," fully illustrated. illustrated.

Pilling's Gape Worm Extractor....

BIT TO PREVENT FEATHER PULLING.

This bit does not interfere with the bird's feeding-it keeps the bill far enough apart to prevent them catching the feathers. Price, \$1.00 per doz. Sample, 10 cents.

SHIPPING COOP

POULTRY SUPPLIES.—Continued.

EYRIE SHIPPING BOXES .- Unquestionably the best device yet

found for shipping safely fancy eggs by express. Made of heavy corrugated card-board; are very strong, compact, light and convenient. The handle, when put in place, locks the box, and it cannot be tampered with in transit. The handle prevents the putting of anything on top of the box and thus prevents rough usage by expressmen.

1 setting, each, 15c; per dozen, \$1 25. | 2 setting, each, 20c; per dozen, \$1 90.

EYRIE SHIPPING COOPS.—The body of the box is composed of one piece of Waterproof Corrugated Paper in the form of a square tube, which folds flat for shipment. The bottom is composed of a frame of wood covered with a sheet of heavy veneer of sufficient strength. The top bottom are made up at the factory and the countries. Both the top and

is composed of a wooden frame with slats running across. Both the top and bottom are made up at the factory, and the only labor required in setting up the coop is the insertion of the top and bottom in the tube and the running of a row of tacks around each. The weight of the coop is less than the muslin coops, and has the marked advantage of only taking the single rate of express. The corrugated paper forms sides and ends which are perfectly tight, preventing draughts. The strength of the coop is such that it will bear any amount of weight, and is perfectly safe, having been accepted by the express companies on the same basis as the wooden coop.

No.A—Size 12x16x18 in., 25c ea.; \$2.40 doz. No.B—Size 12x18x22 in., 30c ea.; \$3.00 doz. No C—Size 12x22x22 in., 35c ea.; \$3.35 doz. No.D—Size 20x22x22 in., 40c ea.; \$4.35 doz.

RED ROSIN SHEATHING PAPER.—An excellent Sheathing Paper,

strong and durable. 30 inches high; 500 square feet to roll.

No. 1, 20 lbs., 60c per roll. No. 2, 25 lbs., 75c per roll. No. 3, 30 lbs., \$1.00 per roll.

BLACK ROOFING FELT.—A Tarred Felt of good quality, excellent for

roofing; strong and durable.
2-Ply, roll of 108 square ft., \$1.15 per roll
TAR ROOFING PAPER.—Rolls 325 square feet, \$1.00 per roll.

TIN CAPS AND WIRE NAILS .- One pound of Caps and Nails is required for each roll of roofing. Per lb., 8c.

ROOF PAINT.—This is put up specially for painting on roofing papers, etc. 5-gallon can, \$1.25.

OILED MUSLIN.—Is thoroughly saturated with oil, and has come into general use for constructing partitions between pens and for scratching-shed curtains in poultry-houses. It is far superior to wire netting for partitions, as it stops all draughts. Per yard, 12c.

WIRE NETTING, POULTRY.—The best wire netting made, with a three-strand cable selvage galvanized after

weaving. We offer this excellent substitute for clumsy wood poultry yards at the following low prices. full bales only; none are cut. Prices for rolls 150 feet long (prices subject to market changes):

PIGEON SUPPLIES.

Pigeon Peas. Small, round pea, largely used as food for pigeons. Per ½ bush., 90c; bush., \$1.65; full bag lots. \$1.60 bush. Vetches. 10c lb.; 4 lbs., 25c; 10 lbs., 50c; 50 lbs., \$2.25; 100 lbs., \$4.25. Tick Beans. 10c per lb.; 3 lbs., 25c; 10 lbs., 75c; 50 lbs., \$3.25; 100 lbs., \$6.00.

100 lbs., \$6.00.

Yellow Pigeon Corn. 5e per lb.; 6 lbs., 25c; 13 lbs., 50c; 50 lbs., \$1.50; 100 lbs., \$2.25.

Pigeon Grits. 5 lbs., 10c; 25 lbs., 30c; 100 lbs., 75c.

Foust's Health Grit. Unequaled for pigeons. It contains peculiar properties which no other pigeon grit contains. They are medicinal and strengthening, and by the use of this grit pigeon fanciers are able to raise a larger number of better pigeons than in any other manner. It contains the necessary elements for the development of the highest physical vigor, purest blood, rugged health and extra endurance. Per lb., 5c; 10 lbs., 40c; 25 lbs., 75c; 100 lbs., \$2.00.

Kaffir Corn. Per lb., 4c; 10 lbs., 25c; 100 lbs., \$1.65.
Rock Salt. 5 lbs., 10c; 50 to 100-lb. lots, 1c per lb.
Nest Pans. 10c each; \$1.00 per dozen.
Pigeon Leg Bands. If bands are put on when the bird is only 5 to 8 days old, the seamless aluminum bands can be used. We stamp with two letters and the year, and numbered from 1 up, if desired. For old birds the open bands of German silver have to be used. These can also be marked with initial and number, as desired, without extra cost.

Price.—For homers and similar-sized breeds, Seamless Aluminum, 35c per doz.; \$2.50 per 100. For dragoods, runts and large breeds, Seamless Aluminum, 45c per doz.; \$3.00 per 100. Open German Silver, for all sizes, 20c per doz.; \$1.25 per 100.

Pratt's Food for Horses and Cattle. It regulates the bowels, blood, liver and digestive organs, and, consequently, it builds up run-down horses, restores lost appetite, prevents and cures pink eye. distemper, heaves, colds, colic, hide-bound, eruptions of the skin, kidney troubles, lung fever, exhaustion, expels worms, grubs and botts, and is a preventive against contagious diseases. It makes the coat glossy and shed nicely. It produces bone, pursue and better staying powers.

muscle and better staying powers.

For Cows.—It increases flow of milk, makes it richer, and produces more butter.

For Hogs.—Cures and prevents cholera, sore throat, inflammation of the bowels, quinzy, diphtheria, etc. 7-lb. pkg., 50c; 12-lb. bag, 75c; eight 12-lb. bags, \$5.50.

quinzy, diphtheria, etc. 7-lb. pkg., 50c; 12-lb. bag, 75c; eight 12-lb. bags, \$5.50.

Pratt's Animal Regulator. A highly concentrated form of Pratt's Food for Horses and Cattle, so that smaller quantities are used to obtain the same results.

20-02. pkt., 25c; 234-lb. pkt.. 50c.

Columbus Animal Condiment. A highly concentrated food for horses, cattle, hogs and sheep. Hogs fatten much quicker, dairy cows produce more milk and butter; invigorates horses. 30-02. pkt., 25c.

Columbus Stock Food. Invigorates, cures and prevents diseases of horses, cattle, hogs and sheep. 6½-lb. pkt., 50c.

Victor Corn and Oat Feed—Is a blend of choice grains, based upon Corn and Oats scientifically proportioned for general feeding purposes. Victor feed is offered the stockman as the best general feed on the market. It has been tried under all manner of conditions, and has never failed to yield a profit. It is safe, sure, successful. Stock fed upon it make constant gains and remain free from disease. Its standard of excellence is unvarying. Its ingredients are analyzed and proportioned. and every bag is warranted of uniform content. 50 lbs., 65c, 100 lbs., \$1.20; 1,000 lbs., \$11 00.

Quaker Dairy Feed. This feed is made entirely of grain, principally of Oats. combined in scientific proportions. It is both nitrogenous and carbonaceous and is designed for the production of milk and the proper maintenance of the animal. 50 lbs., 60c; 100 lbs., \$1.15; 1,000 lbs., \$10.50.

Retsof Rock Salt for Stock. Per 100 lbs., 75c; 500 lbs., \$3.00; 1,000 lbs., \$5.50; 2,000 lbs., \$9.50.

Prices subject to Market Changes, \$1.50; 10 bags, \$1.50; 10 bags, \$14.00; 20 bags, \$27.00.

The following brief directions for the spraying of fruits and vegetables have been complied as the result of several years' experimenting with different in tertals, and they can be followed without injury to the crops, and with profit to the owner. It will pay to spray all fruit plants in the spring with copper sulphate solution, and the second and third applications as given can generally be made with profit. Never spray with arsenites while the trees are in biossom, as the bees will be poisoned; they are necessary to fertilize the flowers.

PLANT	First Application	Second Application	Third Application	Fourth Application	Fifth Application
Apple (Canker worm	of int, using copper sul-	have formed, but be-	after blossoms have fillen, Bordeaux and		10 to 14 days later, Bondeaux or weak copper sulphate.

EXPLANATION —When an asterisk (*) is used it cautions against spraying with poisons while the plants are in blossom; a dagger (*) indicates that there is danger of making application within three weeks of the time the fruit is to be used as food. While the number of applications recommended will be found desirable, in seasons when the fungi are less troublesome a smaller number may often suffice.

FORMULAS.

BORDEAUX MIXTURE.—Copper sulphate, 4 lbs.; Quick lime, 4 lbs.; Paris green, [for leaf eating insects,] 4 oz.; Water, [one barrel,] 40-40 gallons. To prevent potato rot, 6 lbs. of copper sulphate is used instead of 4.

KEROSENE EMULSION.—For sucking insects. Kerosene, [coal oil,] 2 gals.; Rain water, 1 gal.; Soap, 1/4 lb. To be diluted before

use with a parts of water.

PARIS GREEN AND WATER.—For insects which eat foliage. Paris green, 1 lb.; Lime, [fresh,] 1 lb.; Water, 200 gals.

COPPER SULPHATE SOLUTION.—Copper sulphate, 1 lb.; Water, 25 gals. For use only before the buds open.

AMMONICAL COPPER CARBONATE.—Copper corbonate, 5 cz; Ammonia, 2 qts.; Water, [1 barrel,] 40-50 gals. For use late in the season when Bordeaux mixture may stain the fruit. Also used for Greenhouse spraying.

View of Lawn at "The Pines," Residence of Albert McCullough.

McCULLOUGH'S "Suburban" Lawn Grass Seed

by a mixture of the most Dwarf Evergreen Gosses that grow and flourish during different months of the year, so that a rich, deep green, velvety him is constantly maintained. Our mixture is the result of several years experimenting, and, as we now offer it, it is inequaled; the immense quantity we annually sell is the best proof we can offer. The quantity required for making a handsome him is four bushels (61 lbs.) per acre, or for renovating old lawns, two bushels, (32 lbs.) per acre. For a plot 15 x 20, or 300 square feet, one pound is required for a new lawn, or about half pound for renovation.

How to make a Lawn.—A fine lawn is an unfailing mark of intelligence and taste, to obtain which the main point is to start Fight. It is now a decaded fact that seed will make a better lawn than turf or seed. The best soil is a good medium texture, neither very heavy or excessively light; the surface should be raked repeatedly, thoroughly pulverized, and smoothed to the desired grub; remove all large stones, roots and hardened pieces of earth that can not be readily broken. As portions sink, the hollows should be hrmly fibed, ample time being allowed for the thorough settling of the soil, which is greatly aided by a few heavy showers of rain, and at the best time for lawn making (April) these are usually sufficiently abundant. When the soil is firm, level and suitably moist, sow "Subtrana" Lawn Grass Sekda at the rate of four bush its 664 lbs.) per acre. One point is sufficient to sow a small yard 15 x 20 feet, or 300 square feet. It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broade ast and as evenly as possible, then give a thorough rolling or pat well with the back of a spade. The seed must be well firmed in the seal. When the voung grass attains a height of three or four inches, carefully mow with a sharp seythe. After this, according to the season, it should be mown with a lawa mower every week or ten days. Each season the cultivated grasses after going to seed, tay dormant; at this time wild grass will appear to some extent but only for a short time, as it will succumb to the vigorous second growth of the other.

Renovating Lawns.—When your lawn has already been established, you will find it to your advantage to lightly re-seed each season. As early as possible, carefully rake off all dead leaves, etc., and sow "Sururban" Lawn Grass Seed at the rate of two bushels (32 lbs.) to the acre; roll thoroughly or pat well with the back of a spade. To preserve a lawn in good condition, an annual dressing of El Paso Sheep Manure, or Pure Bone

Suburban Lawn Grass Seed.

Price: 12 lb., 15e; 1 lb., 25c; 5 lbs., \$1,00; 1 bu. of 16 lbs., \$3,00. If wanted by mail add 10c per lb. extra.

McCullough's Lawn Grass for Shady Places.—On nearly all Liwns there are shady bare and unsightly spots on which the owners have difficulty in getting a stand of grass; for such places this mixture is adapted. It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour" or drainage defective, it is apt to be covered with moss. If such is the case apply some lime or land plaster to sweeten it, but the moss should first be removed by the use of a sharp rake, then sow the seed at the rate of four bushels (64 lbs.) per acre.

Price: 1 lb., 40c; 5 lbs., \$1.50; 1 bu. of 16 lbs. \$4.50. By mail 10c per lb. extra.

McCullough's Golf Link Grass Seed. We have given much attention to grasses for Golf Links. The mixtures we ofter below are composed of such varieties as will thrive here, and are the results of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on the Golf Links.

We have always on hand all the natural grasses of Europe and America, and we are famillar with the habits and merits of We shall be glad to prescribe for whatever the requirements of the Links may be for poor land or rich, high and dry, or law

Putting Green Mixture.—A mixture of extra fine grisses, that will make a close, firm, green and lasting turf, which will ove the more it is trainped on.

Per lb., 3.0c; 5 lbs., \$1.40; 1 bu. of 16 lbs., \$4.00. By mail 10c per lb. extra. improve the more it is trainped on,

Golf Link Mixture. - For the grounds in general,

Per 1b., 20c; 5 lbs., 80c; 1 bu. of 16 lbs., \$2.25. By mail 10c per lb extra.

McCullough's Terrace Mixture.-There is nothing more annoving than to have ground washed out. In this mixture we have put quick growing and deep-rooted grasses. Of course it depends a great deal on this being well started before a wash-out,

Per lb. 30c; 5 lbs., \$1.40; 1 bu. of 16 lbs., \$4.00. By mail 10c per lb. extra
